

## ***New Data Warehouse FASP Reports***

The Data Warehouse Team is pleased to announce a new set of predefined FASP reports in the Cognos ReportNet environment. The FASP Activities Series focuses on the FASP submittal-approval process and includes four main reports:

- Overdue FASP Activities
- Due FASP Activities
- Current Pending FASP Activities
- Approved FASP Activities

Each report contains a list of FASPs, relating to a particular phase in the submittal-approval process. Based on the parameters selected at the report prompts, the reports display a list of FASPs with the number of times each has been submitted, rejected, and approved, as well as the number of days the FASP has been in the submittal-approval process. Users can “drill thru” any FASP in the main reports to access the FASP Activity Details report, which provides a chronological list of its submissions, rejections, and approvals.

If you already have access to the Cognos ReportNet environment, you can find the new reports in the “OCFS DW – FASP Reports” folder, along with our other FASP reports. If you do not have access to the Cognos ReportNet environment, you can request access by emailing the Data Warehouse Team at [data.warehouse@ocfs.state.ny.us](mailto:data.warehouse@ocfs.state.ny.us). Include your full name and HSEN ID, and “cc” your Director or Security Coordinator on the email.

The FASP Step-by-Step Guide has been modified to include information on the new FASP Activities Series and can be downloaded from the Data Warehouse page of the CONNECTIONS Intranet site.
