OCFS Data Warehouse Users Must Upgrade Reports on their T drives

The OCFS Data Warehouse software has been upgraded to Cognos v7. Although the Data Warehouse Team has already upgraded all the pre-defined user reports, users will have to upgrade any PowerPlay and Impromptu reports that they have saved to their T:\ Drives. It is extremely important that users save back-up copies of their reports before attempting to upgrade them. See attached pdf for step-by-step instructions to upgrade Impromptu reports. (Instructions for updating PowerPlay reports will be sent once the PowerPlay cubes are available in the new environment.) Contact the Data Warehouse Team at data.warehouse@ocfs.state.ny.us for assistance.
