Re: Release Notes: Updates to CONNECTIONS Build 15 Functionality

Date: June 12, 2002

This document describes updates to CONNECTIONS Build 15. The following section provides a list, by functional area and SIR of the changes/fixes included in the Build 15.02 software update.

Summary of Functionality Updates/CONNECTIONS

Build 15.02 - Scheduled for 6/15/02

SIR#	Functional Area	Description
Data Fix SIR# 24855	Person Search – Person Record	Data Fix to convert all person records with the name Xxx, Xxx (created since Build 15) to Unknown, Unknown.
Code Fix 24872 Data Fix 24892 Completed 6/7/02	FAD – FRS Inaccessible if License Window Approved	Corrects the condition whereby the FAD Record Summary became inaccessible when the Home License Window was submitted for approval in advance of the related FRS Reauthorization Document. The solution will present the user with a message if an FRS is started when a re-auth or home opening event is pending approval, “Saving will invalidate the Pending Approval. Continue in Modify Mode”. Saving will invalidate the pending home opening/re-authorization approval and the user will be able to re-submit the bundled FRS and Home License window for approval.
24867	FAD – Medical Date Edit for Re-Authorizations	Modification to FAD medical date edits for reopened homes. If a home is system closed and then re-opened, the system will consider the medical date to be valid if it is

		within 24 months of the prior period authorization "To" date.
Code Fix 24866 Data Fix 24891 Completed 6/7/02	FAD Home Study Narrative Print	This fix addresses print problems with some cases that were in a "Pending" status during Build 15 conversion. When printing these Home Study narratives, the user would receive the error message: "Generate formal FRS document 4605. This command is not available, insert footer."
24887	FAD Medical Date Edit -License Only Changes	The system will no longer check for valid medical dates when the Home License window is saved and submitted without changes to the current certification dates, i.e. when submitting interim home license updates.
Code Fix 24864 Data Fix 24864	FAD Maintain Licensing - School District Code	Disables the ability to type in the "Sch Dist" field on the FA Home Demographics window.
24911	CPRS Local Notes - First Form Field Modification	This modification addresses an MS Word feature that automatically selects the first form field in a template when it is opened as a document. The feature was causing inadvertent deletion of data entered in that first form field. When CPRS local notes templates are opened for update, the first form field will no longer automatically be selected. Note: ACS Local Notes template, which contained an unlimited narrative in the first form field, was modified and implemented on 5/03/02 as an immediate fix to this issue.
24691	Investigation Conclusion Narrative	Corrects format, typographical errors, and clarification of the standards for maltreatment.
24901	CPRS - Print All	Corrects the error that was being created when the number of characters in the selected "Race" field was larger than the space allowed in the Household Comp grid.

24636	Investigation Summary Report	<ul style="list-style-type: none"> Removes case name, case id, intake id and investigation id from the IAB Investigation Conclusion Narrative - Facility Investigation Summary Report. Corrects Header/Footer overlay in the IAB and CPS Investigation Summary.
24857	Telephone Carryover - Reporter	Corrects the condition that caused the phone information (number and type) to carry over when a particular navigation path is taken in Intake.
24877	CAR (Clearance, Appeals & RFI)	<p>Modification to window code to allow embedded space in the First Name field when performing a Phonetic or Exact search on the Inquiry window in CAR.</p> <p>Note: SCR Impact Only</p>
24900	CAR (Clearance, Appeals & RFI)	<p>Modification to the Detail window so that the delete confirmation message box, ("Saving will delete match records, continue?") will no longer be displayed.</p> <p>Note: SCR Impact Only</p>
24902	CAR (Clearance, Appeals & RFI)	<ul style="list-style-type: none"> Modification to the Clearance Header window so deletion of the Request ID will no longer occur on the Header window after a new request type of ADREV or RFI has been entered and an "online search" has been performed on the Detail window. The Save push button has been disabled on the Header window after a new request type of ADREV or RFI has been entered and an on-line search performed on the Detail window. <p>Note: SCR Impact Only</p>
24909	CAR (Clearance, Appeals & RFI)	<ul style="list-style-type: none"> Modification to the CAR Header window to attach appropriate status codes for ADREV request type on the Header window when a different search request type was used on the Inquiry window.
