CONNECTIONS Build 18.9.6 Release Notes

-- Implementation Date of the Build: March 7, 2008 --

[A description of the Build modifications, enhancements, fixes and impacts]

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

What is contained in Build 18.9.6

Responses to Functional Improvement Team Requests (short term items not provided in previous Builds)

- A comment box will be added to the Life Skills Assessment where the user can document information with regard to these assessments.
- Adding a grammar check to narrative areas and adding an improved spell check to both narrative areas and comment boxes, to provide more 'WORD-like' functionality in these areas.
- The Service Plan area of the FASP and FASP output will now include Outcome and Activity blocks that were discontinued in the last FASP so that workers have a more complete picture of the Service Plan and its related history.

User Requests

- Voluntary Agency workers will now be informed that there are reports prior to 1/1/2006 (date of ADM) - these reports will be listed on the CPRS and FSS Case Summary tabs providing a more complete view of the CPS history.
- A new Progress Note type of "Other Casework Activity" has been created that will allow the field to select purposes of "Cross Reference" "Case Closing" and "Transfer". The "Cross Reference" purpose will allow the caseworker to summarize the cross reference history. Voluntary Agency workers within the CPRS Progress Notes module will not be able to search or view the Progress Note type of "Other Casework Activity" with a purpose of "Cross Reference." This purpose can be entered prior to a purpose of 24 Hour Contact.
- Two additional Progress Note types "Notice" and "Approval" will be created for those districts using higher level edits.
- Additional Day Care/Foster Care Investigation closure reasons will be added in accordance with programmatic need.
- FAD workers will now be alerted when a CPS report involving a foster or adoptive home member is determined.
- The Permanency Hearing Petitioner information will now be enterable and included on the output.
- The To-Do list displayed to the user will now include all To-Do's coming due within the next 30 days. This view assists the worker in managing the approval of the FASPs coming due.

New Legislation\Program Initiatives\Support of Federal Requirements

- Support for the 2007 legislation regarding FBI Fingerprinting and out-of-state child abuse and maltreatment checks will be implemented in the Foster/Adoptive Home Record summary.
- Bridges to Health (B2H) - B2H will provide community based services to children who are in the care and custody of a Local Social Services District (LDSS) or OCFS, and who have significant mental health, developmental disabilities or health care needs. This functionality will be available for children with B2H waivers (currently in New York City, Albany Region and Rochester Region).
- AFCARS - capturing the necessary, remaining elements for AFCARS compliance in order to improve New York State's submission. The design builds on some existing windows in order to complement the existing workflow and minimize worker impact and creates one new adoption related window.

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Bug Fixes

Numerous (50-60) bug fixes in areas such as performance, system errors and access to data are also included in the Build.

Below is a listing by User and Area Affected, Issue Description and Fix/Impact, and System Investigation Request number (SIR). Please note that SIRs that are combined reflect the work involved to affect the changes required.

Definitions of the terms used in this document

The *Functional Area* section identifies the part of the application that is involved in the modification, enhancement or fix. The *Issue Description* section describes the issue that will be resolved. The *Fix/Impact* section describes what the Build is expected to accomplish (impact) and the *SIR ID* section identifies the internal tracking number of that request. Please note that the SIR ID section also includes if that particular SIR was identified as one to be fixed by the *CONNECTIONS Functional Improvements Team (FIT)*.

Resources/Questions

- If you have questions about local practice, policy or procedures, we ask that you first review these procedures with your supervisor.
- For all other CONNECTIONS related questions you can contact:
 - the APP HELP mailbox by filling in the form titled: *CONNECTIONS Application Help Request* (posted to the CONNECTIONS intranet on the CONNECTIONS Forms page) and emailing the completed form to the following address: ocfs.sm.conn_app@ocfs.state.ny.us. A few points about the address: please note that there is one underscore in the address, and the underscore has to be typed into the address in order for the email to be directed to the correct mailbox, and if you are emailing 'out of our network' we ask that you tack on the following piece to the address: @dfa.state.ny.us or, @nysemail.state.ny.us
 - the NYS OFT Enterprise Help Desk 1-800-697-1323
- Any additional WMS questions should be directed to the OCFS-IT Customer Support Help Line at 1-800-342-3727.
- BICS issues should be reported to the BICS hotline at 1-800-342-3010.
- SSPS issues should be reported to either Nancy Pare at 212-383-1382, or Maureen Godwin at 212-383-2483.

Job Aids

Three job aides will be available on the CONNECTIONS website posted to the Training page. They will cover the following topics:

- AFCARS
- Bridges to Health
- Enhancements

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Build 18.9.6 Functional Improvement Team Requests

Functional Area	Issue Description	Fix/Impact	SIR ID
Common	The field has requested that a Grammar check be added wherever the text tool is used.	Add Grammar Check to Text Tool. The Spell and Grammar Check was also added to the PHR. Caseworker must highlight the text in the enterable field and activate the spell/grammar check. Spell/Grammar Checker will not work if areas other than enterable fields have been highlighted.	FIT 6092 &7992
Common	Currently when a word is misspelled, it is underlined only until the next correctly spelled word is typed. Plurals are also displaying as misspelled.	This fix adds commonly used words to the custom dictionary. Misspelled words will remain underlined until corrected. Plurals will no longer display as misspelled.	FIT 6095
Family Assessment & Service Plan	When an Outcome and Activity Block is given a status of Discontinued or End-Closing Stage, the O & A block does not print in the FASP where the change is made.	Print FASP O&A Discontinued and End-Closing Stage Blocks on Current FASP where the status is updated.	FIT 7424
Family Assessment & Service Plan	A request has been made to add a comment box to the Life Skills Assessment that stores comments by child, worker and date.	A comment box is available to individuals associated to a given child and the Case Planner to explain any responses to the Life Skills Assessment. Entry into this comment box will be stamped with the worker ID and date. All workers with a role in the stage can view the Life Skills Assessment and any related comments.	FIT 2759

User Requests

Functional Area	Issue Description	Fix/Impact	SIR ID
Child Protective Case Summary	In an effort to provide comprehensive services to children and families involved with the Child Welfare System, a request was made to allow access to relevant Child Protective Services (CPS) Investigation information in all Pending and Indicated cases for all appropriately assigned Voluntary Foster Care Agency and Contract Preventive Agency staff.	This fix will allow voluntary agency staff to see a list of the entire CPS stage history. VA staff will only be able to drill into cases and view information and events on CPS stages from 1/1/06.	7520
Foster Adoptive Development	A request has been made to notify FAD workers when a foster home member on their caseload has been reported to CPS, with an Alert and in addition, to create an Event, when a CPS investigation conclusion is approved.	An Alert is sent and an Event is created in FAD when a determination is made on a CPS case involving a foster home member. Upon Approval of the determination of an investigation an Alert and an Event are sent to the Foster Home licensor and their supervisor in FAD: <i>CPS Investigation Complete for stage id <stage id></i>	2763

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Investigation Conclusion	FSIs were being created in error on Day Care/ Foster Care Child Protective investigations. A request has been made to add new closing codes for DC/FC investigations and to have these codes prevent this.	This fix disables the Indicated and Unfounded Open Closure reasons on the Investigation Conclusion for CPS investigations classified as Day Care/Foster Care and adds the following Closing Codes: 1. Corrective Action Required 2. No Corrective Action Required 3. Unable to Contact/Moved Out of Jurisdiction	7117
Permanency	A request has been made to add the Petitioner Information to the Court Information window including Petitioner Name, Title, Address and phone number and for Petitioners Attorneys including Name, Address and phone number.	The Petitioner fields are added to the Court Information window as enterable fields and pertain to all invitees This information is to be entered on the Court Information Window and then it will pre-populate on the Notice.	6504
Progress Notes	A request for the addition of new progress notes types "Notice," "Approval," and "Other Casework Activity," with new associated purposes has been received. The new progress note type "Other Casework Activity" with a purpose of "Cross Reference" may not be searched on or viewed by VA workers within the CPRS Progress Notes module. It should be allowed to be entered prior to the "24 Hour Contact." This type is to be enterable and viewable within the FSS stage by VA workers.	New Types Added: Notice and Approval: Associated Purposes: 1. Return of Child During Trial Discharge 2. Request to file FCA Article 10 Petition On Voluntarily Placed Child 3. Homemaking Services 4. Day Care Services for Child In Care 5. Consent for Medical Care/ HIV Testing 6. Special/ Exceptional Board Rate 7. Suspend Payment/ Lift Suspended Payment(Other than Trial Discharge) 8. Out of State Visits 9. Initiate Interstate Compact 10. Termination of Parental Visitation 11. Request for Utilization Review Level of Care Exceptions 12. Change in PPG 13. Enlistment In the Armed Forces or Job Corps 14. Marriage 15. Report of Accident or Illness 16. Plan Amendment - Other 17. Plan Amendment - Preventive Services Are Started/Ended for a Child 18. Plan Amendment - Case is Closed to CPS 19. Plan Amendment - Child is Entering/Re-Entering Foster Care 20. Plan Amendment - Child is Moved From One Foster Setting to Another 21. Plan Amendment - Child Becomes Legally Free for Adoption 22. Plan Amendment - Trial Discharge 23. Plan Amendment - Final Discharge 24. Plan Amendment - Child Entering/Reentering Direct Placement with a Relative/Resource 25. Plan Amendment - Child Returned Home from a Non-LDSS Placement.	7115 & 7512

		<p>In addition, for the Approval Type only</p> <ol style="list-style-type: none"> LDSS Exec Level Approval VA Exec Level Approval <p>New Type added: Other Casework Activity</p> <p>Associated Purposes:</p> <ol style="list-style-type: none"> Cross Reference (LDSS Only) Case Closing Transfer 	
To Do Detail	The current To Do List returns 14 days of upcoming To Dos. A request to increase the number of days returned in the default view from 14 to 30 has been received.	The To Do List is set to return To Dos coming due for the next 30 days.	7432

New Legislation\Program Initiatives\Support of Federal Requirements

Functional Area	Issue Description	Fix/Impact	SIR ID
Foster Adoptive Development	The fingerprint letters available in CONNECTIONS do not contain the language regarding new legislation requiring FBI fingerprint checks for individuals over the age of 18 living in Foster/Adoptive homes.	The current fingerprint notification/denial letters (English and Spanish) are updated to include the FBI check language. In addition a person specific FBI Fingerprint Consent form is created and will be generated from CONNECTIONS for individuals who are fingerprinted. (Note: this applies ONLY to prospective foster and adoptive parents (and adult members) who are applying for certification/approval by Voluntary Agencies.)	6376
Foster Adoptive Development	Federal legislation was passed requiring Districts and Voluntary Agencies to check the child abuse and neglect registry in each state the prospective foster or adoptive parents and any other adults living in the home have resided in the preceding five years. No visual cue exists for workers regarding Out-of-State Central Register database checks. The F/A Home license window should not be allowed to be submitted for approval until all database checks are returned and recorded.	A field is added to the FAD record summary to allow recording of multi-state checks for Child abuse and Maltreatment. The columns in the table include Name, State, Date Sent, Date Received, and Results . Results field will contain the following values: Record Received; No Record Found; and Unable to Release . When a date is entered in the Date Sent field, the home will not be allowed to fully open until the Date Received and Results fields are completed. A check box is added to the F/A Home License window indicating that a home has completed the necessary out-of-state SCR checks. It is set when the results fields are complete.	6415 & 7443
Family Assessment & Service Plan (B2H)	CONNECTIONS will be used to record information on Bridges to Health (B2H) Enrollment and Services and the B2H Child and Adolescent Needs and Strengths (CANS) assessment tool.	The B2H window allows users to record the following transactions: <ul style="list-style-type: none"> Enrollment into the B2H waiver program Transfers between Health Care Integration Agencies (HCIAs) Discontinuance from the B2H Waiver Services CANS 	6433
AFCARS	In order to meet federal AFCARS submission requirements,	Clinical Appointment tab -diagnoses recorded on this window for Foster	6430

	<p>new data fields are added to collect those AFCARS elements that are missing.</p>	<p>Children will now be used to derive several AFCARS elements. Tracked Child Detail- New Fields on Removal Information window will capture 'Conditions Associated with Child's Removal' Placement Information tab-new section on foster care information New messages-on Program Choice/PPG, FASP Appropriateness of Placement, Plan Amendments, and Finalize Adoption AFCARS Adoption Information window-new window to capture information at time of adoption finalization</p>	
--	---	---	--

Bug Fixes

Functional Area	Issue Description	Fix/Impact	SIR ID
Address Validation	<p>Entering more than 25 characters in a Caretaker address causes an error.</p>	<p>Caretaker street address length has been increased from 25 to 30 characters.</p>	3901
Approvals	<p>When the person who submitted the FSS closure for approval is end-dated before the approval is completed, the approver receives an error when navigating to the FSS Closure.</p>	<p>This fix will eliminate the error and allow approval.</p>	7175
Child Protective Case Summary	<p>CPRS Case Identification Tab displays stage IDs of stages that have been purged. When an INV and its corresponding INT stages have been purged from the data base and the case is not purged, the purged stage ID continues to display. In addition, the FSS case is not showing as closed when a stage in the case has been expunged.</p>	<p>Stages that have been purged will no longer display on the CPRS Case Identification Tab and CPRS report. This code fix will ignore stages where the status field is blank and return the case as closed when all stages remaining are closed.</p>	6217 & 6570
Child Protective Case Summary Security	<p>Currently CPS stages are categorized into four different types 1) Indicated, 2) Unfounded, 3) Under Investigation and 4) ARI. Only, INI, SUB and DUP stages are considered in this regard. Add Info type it does not fall in any of the above four categories and therefore, the security module cannot determine any rule that would allow the user to see the Case Summary/Event List for this stage. User receives an error message "You do not have the security to view the summary of this case" and is denied access.</p>	<p>A new rule is added. If the user has Access All in District/Agency then allow the user to access the CPS stage even if the stage cannot be classified as indicated or unfounded or under investigation or ARI.</p>	7523
Common	<p>Non-Text Tool comments fields need to be consistent with spell check tool.</p>	<p>All non-text tool areas containing comment fields will be updated to use the new Wintertree spell check product with the custom CONNECTIONS dictionary.</p>	7374
Common	<p>Use the CONNECTIONS custom dictionary with the Wintertree spell check product.</p>	<p>This update will verify that non-text tool comment fields, as well as the Text Tool, are using the correct CONNECTIONS custom dictionary with the Wintertree spell check product.</p>	7375

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Common	Legal has requested that we add American Samoa to the State drop down list in Person Detail.	American Samoa is added to the Person Detail drop down list to be used when entering addresses.	7510
Education	Education Records are not displaying through Case Search path.	This code fix updates the Education Module to be visible through the stage and case search paths.	6798
Education Security	A request has been made to create a new Security Attribute to support the Enter Education Business Function.	The Security Attribute 'Enter Education' is added to the list. This Business Function can be assigned but will not be activated until a subsequent Build.	7466
Event List	The Event History Report is not printing for either an Unfounded Investigation Stage or an INV stage that is closed as duplicate. The Event History Report should display all Events for Case/ Stage regardless of the determination of the stage.	All Events on a case/stage will display as required.	4883
Event List	Event List window is not displaying the 40 th event when there are exactly 40 events and the page down button is disabled.	The code was updated to return all events on a case/stage in the Events List window.	7463
Family Assessment & Service Plan	When there are no comments entered on the previous FASP, there is nothing to carry forward into the comments box. The message "Review comments from previous FASP" is misleading as there is nothing in the comments box to review.	When the scales are pre-filled from the preceding approved FASP, a system status message will display on the bottom of the window "Review the scales/comments that were pre-filled from the last approved FASP". This message will remain on the screen throughout the FASP cycle.	7821
Family Assessment & Service Plan	When a child has a Program Choice of Non- LDSS Custody, completion of Placement and Planning Issues "Record Return Home" tab should be optional and should not appear in the check FASP detail grid as being required.	The caseworker has the option of completing the "Record Return Home" tab. IF the worker saved information on the tab, then the "Record Return Home" tab will appear in the Check FASP Detail list to determine completeness.	6587
Family Assessment & Service Plan	If the worker enters information into the "Child Moved from one Foster Care setting to Another" component in the Plan Amendment, the information is not showing up on print preview and is not printing on the Plan Amendment Report.	This fix will allow display on print preview and will print information, as required, on the PA Report.	7685
Family Assessment & Service Plan	If the worker enters information for sub-categories on the Programmatic Eligibility window, and saves and exits the window, when the worker re-enters the PE window, the secondary selections do not display.	This fix will open the window to the last saved section.	6688
Family Assessment & Service Plan	Placement Information section in the Stage Composition of the FASP report is populated even when the Program Choice of Placement has been end dated.	This fix will return information for the Foster Care Issues section only if one of the active PCs for the child is Placement.	6692

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Family Assessment & Service Plan	Life Skills Assessment (LSA) information for children with end-dated program choices are displayed in both Foster Care Issues (FCI) and Non-LDSS Custody sections. Life Skills Assessment should be listed separately based on child's Program Choice.	This fix will return the following results: <ol style="list-style-type: none"> 1. When only FCI information is present display LSA with FCI. 2. When both FCI and Non-LDSS Custody information is present display LSA only with FCI. 3. When Non-LDSS Custody information is present display LSA with Non-LDSS Custody. 4. When LSA is added via 'Add a Component' menu item, display LSA with FCI. 	7153
Family Services Assign Window	There have been multiple instances where more than one CP assignment exists, either the same worker or another worker. Individuals who are assigned twice to the same stage are unable to be unassigned. Attempting to unassign a stage causes a Data Access Error.	This fix will not allow a duplicate assignment. The individual that attempts to save an assignment after a worker has already been assigned receives the error message "Data has been modified by another user." In addition, the unassignment of duplicates will be allowed.	4207 & 4923
Family Services Intake	Intake worker receives an error when attempting to close the FSI when a decision and closure reason are entered and subsequently saved and a new decision is entered prior to exiting the window.	The code will be updated to clear the closure reason when a decision is changed on the window and the closure reason will be highlighted in yellow, to indicate that it is a required field.	6600
Foster Care Issues	Visiting Plan Review status never changes for Non-LDSS Custody. Review status remains the same "Not Applicable" and never changes to "Complete" even when information has been entered.	This update changes the status to "Complete" when the Visiting Plan has been completed, regardless of the type of custody.	6765
Foster Care Issues	When Adding and completing Life Skills Assessment via 'Add the Component' option, returning to the FASP tree displays all the FCI components. The component reports are also displaying incorrect data.	This fix will display only the LSA when it is the only component selected. The same change will be applied when the only component selected is Discharges.	7002
Foster Adoptive Development	The Phone Extension Field entries cause errors when phone extensions are more than 5 characters on the FAD Record Summary (FADRS) window.	The database is updated to allow 8 characters in the Phone Extension field on the FADRS window.	7300
Foster Adoptive Development Security	A voluntary agency worker with maintain FAD security and a role in the Family Services Stage is able to access district operated FAD homes via their implied role.	This fix will block Voluntary Agency access to district operated FAD homes via their implied role.	7372
Health	When no Mother or Father has been identified in the Family Relationship Matrix (FRM), the resulting message box wording on Bio Family Health is unclear.	When there are no parents identified in the FRM, the message will read "No Mother or Father exist. Mother/Father columns cannot be generated."	6574

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Health	Caseworkers from an agency or district and/or CPS Worker/Monitors assigned at the time of stage closure with VIEW HEALTH BF are unable to view health records for children under their agency responsibility at the time of closure.	This code fix will allow access by assigned District/Agency Caseworkers and CPS Worker/Monitor with the VIEW HEALTH BF, to view historical health information up to the date of the case closing.	6577
Health	Worker is unable to generate Child Health History Report under certain circumstances. The error "HealthServUI.frmHealthRptOpts.cmdOK_Click....."	The code will be updated to recognize a diagnosis of Other and will no longer return the error.	7039
Health	Allergens are not displaying in alphabetical order.	This fix will arrange Allergens in alphabetical order.	7401
Health	When a worker moves back and forth between appointments, the Clinical Appointment Type List sometimes shows an incorrect selection for existing records in the History Grid.	The code is modified to clear the appointment selection before populating with the new selection	7589
Intake	Date Of Death is not appearing correctly on Intake Report. When a child has a DOD entered into the system during an Intake- the DOD field only populates the first two digits of the year.	This fix modifies the start/end columns for the DOD on the report to include the entire date.	7198
Investigation Conclusion	The CPS worker is able to modify all areas of the Investigation Conclusion Narrative Template.	This fix will only allow editing in the grey form field areas.	7329
Legacy/ Interfaces	Users are able to enter non-alpha characters in name fields. This affects all name fields.	This fix will allow only Alpha characters in name fields.	5682& 5683
Local Data Maintenance	When performing Local Data Maintenance on stages where a WMS case number was required when closing a stage with an open closure reason, the user receives a pop up message "This action will change the current closure reason from Closed to Open. Remember to update Case Status Maintenance." and the user is unable to proceed.	This fix will bypass the check for the WMS case number when performing Local Data Maintenance on closed stages.	7519
Local Data Maintenance	The checks and updates that are done on clicking the Save button with the Add function, are not completed with the Relate function. When a worker performs Local Data Maintenance, no Event is created and the Records Retention table is not updated when a person is added to a stage using the Relate function. This results in the Expungement date not being updated.	This fix will generate an Event on the Event List and update the Records Retention Table.	4501

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Merge/Split	When two Family Service Stages are merged, the Merge Batch is not writing the case number to the old case. This results in the user being unable to print Progress notes from the closed case. An error message appears, "SecureProgNote.SecureBPA Access. SecureCreateReport failed.....".	The Merge Case Batch will be updated to assign the new case number to the closed case so the user will be able to print.	3329
Merge/Split	When performing a person merge/split in CONNECTIONS the staff-Name Split is not populating correctly.	This data fix will populate the name of the staff person performing the merge/split	6557
Permanency	Can not associate Adoptive Mother to her attorney. When a worker is completing statements and inputting the interest of the adoptive mother's attorney, a pop-up that read:"No parents or guardian identified in the family relationship matrix. Select a different interest or update family relationship matrix" was received.	The system is updated to recognize the following Relationships as having an interest: Mother, Adoptive Mother, Father, Alleged Father, Putative Father, Adoptive Father, Legal Guardian, Legal Custodian.	6499
Permanency	When a worker is an historic worker, the Permanency Notice grid displays the name and agency, but the notice is blank. A Case Planner was invited to the hearing and then unassigned. The name of the historic worker displays in the grid but the notice will not print when All is selected and will not print a name if just the unassigned Case Planner's name is selected in the Print Notices window. Additionally, the name no longer displays in the Statement.	The Mail Statement, print notice, and print statement on Permanency Notices and Statements window are updated to display the name and agency for all historical workers.	7170
Plan Amendment	When a Plan Amendment is dropped to Template and the user attempts to modify it, the user receives an error and the Plan Amendment does not open.	The Plan Amendment Template will no longer experience the error.	7427& 7447
Person Detail	The worker is unable to make updates to Person detail when a Principal (PRN) has allegations of Maltreatment (MA) in one stage and is active in another stage with allegations of Sex Abuse (SXAB) and/or Fatality (FATL).	The database will be updated to return the Stage ID rather than the Case ID allowing updates to Person Detail, as necessary.	6967
Progress Notes	An agency worker is unable to view notes in closed stage. Agency worker's role was changed from CW to CP. Worker was the CP at the time of closing.	The database is fixed to look for the both active and historical role values to determine security for viewing closed stage notes.	7158

CONNECTIONS

NYS Office of Children and Family Services

Build 18.9.6 Release Notes - February 22, 2008

Functional Area	Issue Description	Fix/Impact	SIR ID
Records Retention	A request has been made to add a <i>Stage-related</i> Destruction Date on the Records Retention Window. Currently, when on the Case Summary window for a closed stage, the Records Retention menu item is enabled under the Options Menu. Clicking on the Records Retention menu item, brings you to the Records Retention window. Information on this window is always <i>Case-related</i> purge data.	Clicking on a closed stage on the Case Summary Records Retention menu item will take the worker to the Records Retention window and the window will display the destruction date for that stage and the case. If the case is not yet closed, the case-destruction date is blank. If the stage is closed, the stage-destruction date is populated.	7169
Safety Assessment	Under certain circumstances, a worker receives the following error "Save failed: SafetyAssessments.UpdateSafetyAssessment failed....." and is unable to save a Safety Assessment.	This fix will correct cases where a foreign key (a symbol i.e.: #, %, ^, @ etc.) is entered and will not allow a foreign key to be entered.	6779
Service Plan Review	The Case Manager's invalid phone information is printing on the Service Plan letter. In addition the name display convention differs based on role.	The letter is updated to return only valid phone numbers. The name standard will be set to LastName, FirstName for all roles.	7320
Service Plan Review	When the Contact Person Name field exceeds 35 characters, the worker receives an error message when attempting to generate Service Plan Letters.	The Contact Person name field on the report will wrap to a second line if it is more than 35 characters and the error will no longer be returned.	3201
Service Plan Review	Invitations and notifications for a service plan review are showing the user's Phone number incorrectly. Telephone extension is not being displayed on SPR letters.	The name, phone number and extension of the Case Planner for the selected SPR will be displayed as CP and CP Phone. The name, phone number and extension of the Case Manager for the selected SPR will be displayed as CM and CM Phone.	3260
Stage Composition	When an invalid date is entered in the DOB or DOD fields and saved, a Data Access Error occurs.	Entering an invalid date will return an invalid date error. The Data Access Error is no longer returned.	6888
Tracked Child Detail	The worker is unable to edit the Program Choice. The Program Choice field is populated upon creation of a case. When the Case Initiation Date is changed there is no mechanism to update the Program Choice effective date.	The minimum date threshold of the Effective Date for both Program Choice and PPG is now the earlier of the 2 dates - Stage Start Date or the CID. And this is validated upon selection of the effective date and not upon selection of the PC/PPG itself. The error will be generated only when the dates do not fall between this minimum date and a maximum date of system date.	6215
Tracked Child Detail	Workers were able to back date the effective date of a Program Choice to beyond the last approved FASP date.	The Program Choice effective date may be backdated to the date of the last approved FASP.	7509
