

## Job Impact Statement

Section 201-a of the State Administrative Procedures Act requires a job impact statement to be filed if proposed regulations will have an adverse impact on jobs and employment opportunities in the State. A full job impact statement has not been prepared for these regulations, due to the fact that these amendments will not result in the loss or creation of any jobs.

These regulations will have a positive impact on jobs or employment opportunities. The regulations will improve the ability of low-income workers who have been displaced from the workforce to search for and be eligible for employment.
