

## Drinking alcohol creates the same risk for every unborn child.

She could be rich or poor. It doesn't matter where she comes from.

She still takes the same risk if she drinks alcohol during pregnancy.

As many as 1 in every 100 babies are born each year with Fetal Alcohol Spectrum Disorder.

Help her make the right choice - **not** to drink alcohol.

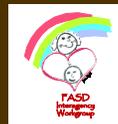

**She'll be glad she did!**

**Counsel women that NO amount of alcohol is safe. You may be eligible for reimbursement for screening and brief intervention.**

**Screening & Brief Intervention & Referral to Treatment (SBIRT)**

**SBIRT** an evidence-based practice model which is proven to be successful in modifying the consumption/use patterns of at-risk substance users and in identifying individuals who need more extensive, specialized treatment. SBIRT is a comprehensive, integrated, public health approach that provides opportunities for early intervention before more severe consequences occur. <http://www.womenandalcohol.org/clinicians.html> and here's a video directed to doctors <http://www.youtube.com/watch?v=BBA4LIEShZY>
