The 2015 Monitoring and Analysis Profiles (MAPS) data packages are being released for Child Protective Services, Foster Care, and Adoption Services.

Also, starting with 2009 MAPS, the Child Protective Services pages will reflect Family Assessment Response (FAR) data.

INTRODUCTION

The Monitoring and Analysis Profiles (MAPS) are data packages that provide information on the major child welfare services provided by local Departments of Social Services (DSS). MAPS was developed in 1985 to support the program monitoring role of the Regional Office staff and New York State Office of Children and Family Services (OCFS). Since then, the MAPS packages, which are produced annually, have also been disseminated to assist in child welfare planning and decision-making.

This MAPS package provides data on Child Protective Services (CPS), Foster Care, and Adoption for all counties. It contains detailed information for 2015 and charts of selected trend information for the five-year period, 2011-2015. Data for New York City, Upstate, and Statewide are contained in separate packages.

Program data on Child Protective Services, Foster Care, and Adoption are taken from the CONNECTIONS Activity Module, formerly the Child Care Review Service (CCRS) database. This is a statewide, computerized child welfare database.

The current MAPS package was developed based on the data contained in OCFS Data Warehouse on March 9, 2016, and from the CONNECTIONS database as of March 9, 2016. The numbers in the MAPS package may differ from those that appear on routine reports that are distributed by OCFS either because they are taken from the databases on different dates or because the definition of a term differs. Additionally, reporting lags by some Local Social Services Districts affects all Foster Care and Adoption data.

In most instances, numbers are converted into rates or percentages to highlight important aspects of the child welfare service programs. The use of rates and percentages is a critical component of MAPS, as it allows for comparisons by controlling for differences in population. The population figures used to calculate rates for 2011 through 2015 are taken from the 2012 Complete New York and New Jersey Demographic Database Files, Woods and Poole Economics, Inc. For Child Protective Services data, rates are calculated based on the number of children ages 0 through 17 because very few reports are taken on youth aged 18 and over. However, since OCFS does have children in foster care 18 years old and above, the rates for Foster Care and Adoption are based on the number of children ages 0 through 21.

The MAPS package focuses on developing a profile of the child welfare services programs in each Local Social Services District. The data describe what are believed to be key, measurable characteristics of county child welfare services. The package is designed to provide a framework within which to examine the relationships among variables, raise questions, and initiate discussions about child welfare programs. It is not intended to judge performance or to focus attention on a single variable.

The MAPS package supports two types of comparisons - comparing a county DSS to a group of comparable counties for a given year, and comparing the county to itself over time. Appendix B lists the counties included in each of the three Comparison Groups, along with a brief description of the methodology used in determining these groups. By referencing a county's data to its comparables, one can identify when a county differs from the norm. In and of themselves,

differences from the norm do not have a positive or negative meaning. Such differences require discussion and analysis to understand them and to determine whether any action is needed.

Definitions necessary to understand the data are printed at the bottom of the appropriate page. These definitions also apply to the multi-year data pages. Appendix A contains additional clarifying information to facilitate an accurate interpretation of complex variables. Careful review and use of the MAPS package are required to understand the data.

In summary, MAPS is not intended to be a package of indicators by which performance may be judged. Rather, it is intended to provide a framework within which reasoned questions can be asked by those who have been trained to its uses and limitations and who have substantive knowledge of the child welfare system in New York State. Questions about this data and suggestions and/or comments related to the design of this package may be directed to Vajeera Dorabawila, Research Scientist/Assistant Director, Bureau of Research, Evaluation and Performance Analytics, 52 Washington St., 3rd floor, Rensselaer, New York 12144-2796, or (518) 402-7386. E-mail requests for copies can be sent to Vajeera Dorabawila at Vajeera.Dorabawila@ocfs.ny.gov.

APPENDIX A: CLARIFICATION OF DATA SOURCES AND DEFINITIONS

This appendix clarifies definitions or specifies which data were used to produce the Child Protective Services (CPS), Foster Care, and Adoption components of the MAPS packages. All Child Protective Services program data used come from the CONNECTIONS database. Foster Care and Adoption data come from the CONNECTIONS Activity Module, the formerly Child Care Review Service (CCRS). Data from 2011-2015 are provided for selected variables. For the definitions of these variables, refer to the MAPS page where the variable appears.

Starting with MAPS 2007, changes were made to the source file, race/ethnicity categories, and the Preventive services pages. Details regarding these changes are found in this appendix.

Population Sources

The population figures used to calculate rates are taken from the 2012 Complete New York and New Jersey Demographic Database Files, Woods and Poole Economics, Inc. The child population includes children under 22 in all program areas except CPS, where only children under 18 are included in rate calculations.

Race and Ethnicity Categories

Prior to 2014, race/ethnicity data in MAPS were based on data entered into CCRS. Since 2014, ALL race/ethnicity data utilized in MAPS is based on CONNECTIONS. Any comparison of race/ethnicity distributions before and after 2014 should be made with extreme caution.

Coding of Race/Ethnicity in MAPS

The Race/Ethnicity categories in the MAPS report use the following classifications:

<u>MAPS Category</u>	<u>Includes</u>
White	White (Not Hispanic)
African American	Black, Interracial Black/White, Interracial Black/Asian Ethiopian, Haitian (Non-Hispanic)
Latino	Interracial Puerto Rican/White, Interracial Puerto Rican/Black, Other Hispanic, Interracial Puerto Rican/Asian, Interracial Puerto Rican/ Other Hispanic, Puerto Rican, Cuban
Native American/Alaska Native	American Indian/Alaska Native (Non-Hispanic)
Asian	Cambodian, Interracial Asian/White, Asian, Laotian, Vietnamese (Non-Hispanic)
Unknown	Interracial Other, Other, Unknown

CHILD PROTECTIVE SERVICES (CPS)

Family Assessment Response (FAR) data

Starting with MAPS 2009, all CPS pages reflect Family Assessment Response (FAR) data for the counties that participate in this approach to CPS investigations. Beginning in late 2008, several counties were approved to use an alternative approach with families for some of their CPS maltreatment reports. This alternative approach, known as FAR, is considered a CPS response,

even though no determination is made as to whether or not there is some credible evidence of maltreatment. The intent of FAR is to promote child safety and family well-being through enriched family engagement.

FOSTER CARE

"Services Prior To/At Foster Care Admission", Page 9

"On the date of the foster care admission" includes the actual date of foster care admission and up to 30 days after the admission date.

Children receiving Child Protective Services (CPS) are those who are in an indicated State Central Registry (SCR) case that remains open, are in an open CONNECTIONS case, and have a Service Program Choice code of "Protective" in CONNECTIONS.

"Admissions, Discharges and In Care, Facility Type by Placement, Location and Age", Page 11

The "Other" category contains many specialized programs/services that serve very few children. If needed, information on what is included in this category is available upon request.

"Days in Care", Page 14

All facility types (level of care) in the table are determined from specific movement codes entered into CONNECTIONS. The definition of foster boarding home includes emergency foster boarding homes. Some children placed in adoptive homes are counted in the foster boarding home category because that is how the home is coded in CONNECTIONS.

Other: Includes residential treatment facilities, skilled nursing facilities, specialized schools, etc.

Congregate Care: Includes Institutions, Agency Operated Boarding Home (AOBH), Group Home, Group Residence, Supervised Independent Living Programs (SILPs), and Other.

Adoptive Home: Includes Adoptive and/or Adoption Subsidy Home.

APPENDIX B: COMPARABLE GROUPS

Comparable Groups were established to permit meaningful comparison between counties with similar child welfare populations. In 2014, the comparable groups were revised based on 2011 child welfare data. This classification is based on cluster analysis (that identified counties that are similar in nature) using the following variables:

- Total number of children with preventive and/or protective services cases open as of 12/31/11;
- Total number of CPS/FAR reports during calendar year 2011; and
- Total number of children admitted to foster care during calendar year 2011.
