

CONNECTIONS

NYS Office of Children and Family Services

Dated: September 22, 2005

What is contained in Build 18.4.2...

The table below is a listing by System Investigation Request number (SIR) with a description of the issue that, at this time, is scheduled to be fixed with the implementation of Build 18.4.2. This Build is scheduled for release on Friday, September 23, 2005.

Definitions of terms used in this document...

The **Users Affected** section identifies those individuals, by program area, who are impacted, **What is Affected** identifies the part of the application that is involved, the **Issue Description** section describes the “issue”/SIR needing resolution, the **Fix** section describes what the Build is expected to accomplish and the **SIR** section identifies the internal tracking number of that request.

Resources for Questions...

- If you have questions about local practice, policy or procedures, please review these procedures with your supervisor.
- For all other CONNECTIONS related questions please contact the NYS OFT Enterprise Help Desk 1-800-697-1323.
- Any additional WMS processing anomalies or questions should be directed to the OCFS-IT Customer Support help line at 1-800-342-3727.
- BICS issues should be reported to the BICS hotline: 1-800-342-3010
- SSPS issues should be reported to Nancy Pare: 212-383-1382 or Maureen Godwin: 212-383-2483.

Build 18.4.2

Users Affected	What is Affected	Issue Description	Fix	SIR
SCR Only	Trace File	Addresses entered on the intake window are overwritten by the address returned from Address Validation upon acceptance of the validated address, however the original address entered is not being written to the CPS Intake Trace File.	This enhancement will add the original addresses entered on the Intake Windows to the CPS Intake trace file before validation.	3294
All	Map Info	Address Validation returns the PO Box on Address Line 2 when the PO Box was entered on Address Line 1. Numbers entered on Address Line 2 without the APT as a qualifier are deleted when validation occurs.	The fix will return a PO BOX on address line 1 when entered on address line 1, and will return PO box on address line 2, when entered on address line 2. A number entered on Address Line 2 will be assumed to be an apartment number and validate as the apartment number.	3344
