Revised Build 18.6

Users Affected	What is Affected	Issue Description	Fix	SIR
All	Progress Notes	When the number of existing notes exceeded search limits, message handling was unclear. The user was required to refine search criteria before the list window was presented.	Message handling has been improved to present the following warning: "*The number of progress notes found is greater than can be displayed in the grid. Please refine search criteria.*" When the user clicks "OK," the progress notes list will display the notes based on the revised search criteria (up to 400). Users may enter new notes and/or refine search criteria to retrieve additional notes beyond the 400 in the initial display.	**3057***

CONNECTIONS

NYS Office of Children and Family Services

Revised Date: *October 31, 2005*

Users Affected	What is Affected	Issue Description	Fix	SIR
Foster Care Issues	Permanency Progress/ Concurrent Planning	Unable to submit a FASP for approval. Check FASP Detail lists Permanency Progress/ Concurrent Planning as incomplete when there are multiple children in the stage and at least one child is over 14. The system is looking for the Resource Connection Tab for all children in the stage, not just the children for whom it should display.	This fix will require the Resource Connection Tab be completed for children 14 years and older only.	3342
Case Manager	FSI	ADVPO cases are not pulling a CID from the FSI trigger dates for the WMS opening date. Consequently, the APP/REG function is not enabled for ADVPO cases.	This fix will use the Date Application Received by LDSS from the FSI for the corresponding WMS case opening date.	3397
Case Planner/ Case Manager	FASP	Cannot copy & paste from approved FASP or Plan Amendment to a source outside of the CONNECTIONS application.	This fix will allow the user to copy information to the clipboard, from an approved Plan, to be available for use outside CONNECTIONS.	3536
All	Person Search	Person Search, when conducted from a Visual Basic (VB) window, is overlaying the match name with the primary name.	Person Search will be modified to use the same logic in all windows.	3542
