

CONNECTIONS Technical Bulletin

New Build: Helpful Info Tab

Scheduled for Implementation Friday, September 29th

The next build to the CONNECTIONS application will occur during the normal morning maintenance window on Friday, September 29th, and will incorporate a new Helpful Info tab off of the main CONNECTIONS screen.

The Helpful Info tab, a screenshot of which is included below, will contain a filterable grid featuring CONNECTIONS tip sheets, job aids, and other helpful documentation, organized by content-area. To the left of each row, a “Navigate” link will directly open the PDF version of these documents to print or review from within the application.

All job aids and tip sheets are currently available on the CONNECTIONS websites, below. With Friday’s build implementation, these valuable resources will also be available from directly within the application itself.
