SETTING SECURITY FOR YOUR VERIZON MiFi 2200

These are steps that MiFi users must take to secure their device from attacks.
To accomplish this, you may need to adjust Local Area Network (LAN) settings.

- **Open** the Internet Explorer, **Click** on the “Tools” dropdown menu, and **Click** on the words “Internet Options”:

- **Open** the “Connections” tab and then **Click** on the “LAN Settings” button:
- **Uncheck** the “Automatically detect settings” and “Use a proxy server for your LAN ....” checkboxes and **Click** the “OK” button twice:

- **Enter** [http://192.168.1.1](http://192.168.1.1) in the Internet Explorer address line:

- **Enter** your new MiFi password in the MiFi login and **Click** the “Login” button:
• **Click** on the WiFi (Profiles) tab.
• **Select** the “WPA2 Personal/PSK (AES)” setting from the Security dropdown menu.
• **Change** your Network key (sign-on password) to one with *at least 20* characters.
• **Click** the “Apply” button.

The connection with the MiFi device will need to be reestablished now.
• **Reconnect** the MiFi device with “WPA2” enabled and **Click** the “Connect” button.

![Connecting to WPA2 network](image1.jpg)

• **Enter** the new Password as noted above and **Click** the “Connect” button:

![Entering network key](image2.jpg)

• You should now be able to access OCFS Internet site **or** use for CONNECTIONS directly via the wireless network at:
  1. [http://www.ocfs.state.ny.us/main/](http://www.ocfs.state.ny.us/main/) **or**

**Here are some helpful hints in protecting your MiFi 2200 and other portable devices:**

• Always keep your portable device with you when traveling.
• Password protect and lock your portable device.
• Record identifying information (i.e., serial number (original SSID number for your MiFi 2200)) and label your equipment.
• Keep your portable device out of sight when not in use.
• Consider storing important information in a separate place or device.
• Report lost or stolen devices to local law enforcement agencies.
• Always shut down the laptop after MiFi use to restore firewall and proxy settings.
