Background

The New York State Office of Children & Family Services (OCFS) announces a discretionary funding opportunity for qualified entities that can conduct a comprehensive statewide needs assessment (CSNA) for The New York State Commission for the Blind (NYSCB).

NYSCB provides vocational and rehabilitation (VR) services to about 4,500 consumers with blindness and visual impairment through seven (7) district offices located throughout New York State. Federal Rehabilitation Services Administration (RSA) regulations require that a comprehensive statewide needs assessment be conducted every three (3) years. The results and recommendations from this assessment are incorporated into the annual plan submitted by NYSCB to the RSA.

Please see the Eligibility Criteria section for additional information.

This advertisement is public notice that OCFS is seeking to contract with organizations to conduct a CSNA for NYSCB which should involve an evaluation of NYSCB case management data, along with primary data collection through the use of surveys and focus groups; leading to identification of specific areas in need for improvement within services and supports, program practices, and policies. The contractor’s CSNA will include providing statewide data as well as regional office-level data for NYSCB facilitating comprehensive planning and policy development. The contractor will work in close consultation with NYSCB staff and the NYS Rehab Council to ensure the accuracy and high quality of the needs assessment white paper/policy brief. Please see the Activities/Work to be Performed section for additional information.

The purpose of this Discretionary Opportunity announcement is to invite any eligible and interested entities who believes they can satisfy the needs of this program, to so inform OCFS by a Letter of Interest (LOI). To be considered responsive, your organization’s LOI must be received no later than the deadline specified on the first page of this announcement. OCFS intends to select one (1) contractor based on the criteria outlined in this announcement. Please see the How to Apply section for additional information and submission requirements.

This opportunity is authorized under Section 163 of State Finance Law as a Discretionary Purchase. OCFS intends to contract pursuant to its discretionary purchasing authority under State Finance Law Section 163(6), which authorizes purchases without a formal competitive process in
certain circumstances. This includes, but is not limited to, purchases up to the Discretionary Buying Threshold from New York State Small Business Enterprises (SBE), businesses certified pursuant to Article 15-A of the New York State Executive Law, New York State certified Minority and/or Women Owned Enterprises (M/WBE), New York State certified Service-Disabled Veteran Owned Businesses (SDVOB), businesses selling commodities or technology that are recycled or remanufactured, or commodity purchases that are food and are grown, produced or harvested in New York State.

As this solicitation is authorized under Section 163(6) of State Finance Law as a Discretionary Purchase, there is a not-to-exceed threshold of $500,000 and limited to respondent organizations qualified as:

1. New York State Certified Minority and Women Owned Business Enterprise (MWBE);
2. Small Business Enterprises (SBE) domiciled in New York State as defined and clarified by New York State Empire State Development – Small Business Division; and/or
3. New York State Certified Service-Disabled Veteran-Owned Business (SDVOB)

Primary respondents must be identified as a NYS certified Minority and Women Owned Business (MWBE), NYS small business enterprise (SBE), or a NYS Certified Service Disable Veteran-Owned Business; and must complete, sign and submit an Attachment 3 – Affirmation of Business Status provided with this solicitation.

Activities/Work to be Performed

The funded organization will:

Conduct a CSNA for NYSCB to identify areas in need of improvement in services and supports, program practices, and policies as related to the provision of VR services to NYSCB consumers, consisting of the following five (5) research studies:

1. Secondary Analysis of NYSCB Case Management System Dataset
2. Survey of NYSCB District Offices
3. Focus Group for Braille and Survey of Teachers of Visually Impaired
4. Fiscal Forecasting for Needs Assessment (Pre-ETS)
5. Reasons for Participants’ Unsuccessful Exit from the VR Program

Study #1 - Secondary analysis of NYSCB case management system dataset:

The focus of the contractor’s analysis should be to examine the factors related to successful case closures for NYSCB participants. These factors may include individual demographic factors including their secondary disabilities and functional limitations as well as the mix of services received. The contractor should focus on understanding the impact of participation in supported employment and postsecondary education for NYSCB participants. Furthermore, the contractor should also focus on studying sub-groups such as transition-aged youth and young adults, and those receiving public benefits (e.g., SSI/SSDI). Based on the available information for costs of services, the contractor will further examine cost-effectiveness of supported employment and postsecondary education services.

The contractor will be provided limited direct access to the NYSCB VR case management system for purposes of extracting the required data. The data set will provide three (3) years of data and include such data variables as: participant’s year of birth, first three digits of participant’s residential zip code, secondary diagnosis (if available), education level attained, individual plan for employment (IPE) goal and services.
Study #2 - Survey of NYSCB District Offices:

The Contractor will conduct a survey of all NYSCB personnel (approximately 58 NYSCB staff members across seven district offices) using online survey tools to understand their perspective on some of the observed trends in participant outcomes from the secondary data analysis that needs additional explanations. This survey will also explore the NYSCB personnel’s perceived barriers in providing services and collaborating with other providers of rehabilitation services for people with disabilities in NYS. This survey will further explore their satisfaction with the information systems and their needs for improving case management systems for adopting data-driven decision-making.

Please Note: Any survey platform used by the contractor, including electronic documents or online formats, must be 508 compliant and should utilize multiple formats, due to different accessibility needs.

Study #3 - Focus Groups for Braille and Survey of Teachers of Visually Impaired:

The purpose of the Braille and Success evaluation is to determine the level of success a person has related to their Braille experiences and proficiency. This evaluation will have two parts, with the first component consisting of focus group discussions with NYSCB participants and the second component being a survey of teachers who teach the Visually Impaired and Vision Rehabilitation Therapists.

Focus Groups

The contractor will conduct a total of two (2) in-person focus groups, with one in-person focus group anticipated to be held in New York City and one (1) anticipated be held in Buffalo NY. Each focus group shall consist of 20-25 participants and NYSCB will provide the contractor with a list of potential participants for the contractor to invite to the focus group(s). NYSCB will provide the physical location for each focus group and the call-in line (no cost to the contractor). Each physical location will have phone conference capability. Note: at NYSCB’s sole discretion, the “in-person” component of the Focus Groups (Part One) deliverable may be altered or changed in favor of a “virtual” component due to factors pertaining to Covid-19.

The scope of the focus groups is to hear participant experiences and determine if braille played a positive role in the participant’s success in school, college and/or vocational training. The contractor must derive both quantitative and qualitative data from these focus groups for further analysis and the contractor will be expected to provide the technology needed to complete this task.

NYSCB anticipates approximately ten (10) questions will be addressed by the focus groups, which may include but are not limited to:

- Do you feel braille contributed to your success at school? At work?
- Please describe your earliest experiences with Braille.
- Who taught you to read braille?
- What grade Braille do you read?
- Do you use Braille for reading, writing or both?
- Do you use Nemeth code?

Note: the final list of questions will be developed in consultation with the chosen contractor.
**Survey of Teachers/Therapists**

The contractor will conduct an online survey of Teachers of the Visually Impaired and Vision Rehabilitation Therapists in NYS. NYSCB will provide a list of these individuals to the contractor. The scope of this survey will be to ascertain their level of braille proficiency and level of experience in braille.

NYSCB expects the online survey will be about ten (10) questions in length. Survey questions may include but are not limited to:

- What is your level of expertise in Braille?
- What do you consider your proficiency to teach braille?
- Do you think public schools are supportive of Braille literacy?
- How many students do you currently have?
- How much time do you have to teach braille given all of the aspects of your work with students?
- What is your experience and/or comfort level with the Unified English Braille (UEB)?
- How do you feel about teaching dual media in Braille and large print to students?

*Note: the final list of questions will be developed in consultation with the chosen contractor.*

**Study #4—Fiscal Forecasting for Needs Assessment (Pre-ETS)**

NYSCB is required to determine the VR needs of individuals with disabilities including youth and students with disabilities age 14-21 (up until their 22nd birthday). In addition, NYSCB is looking at the extent to which these services provided are coordinated with transition services under Individuals with Disabilities Education Act (IDEA) or 504 Plan. Both ensure that a child with a disability is provided with accommodations that will ensure their academic success.

Currently, NYSCB is working to gain a better understanding by using new strategies to identify individuals NYSCB considers eligible and individuals NYSCB considers to be potentially eligible for services, as it relates to students with disabilities (age 14-21) in NYS and who may be potentially eligible for pre-employment transition services (Pre-ETS). This data will enable NYSCB to accurately forecast the amount of reserved funds necessary for ensuring the required Pre-ETS are met and available to all students that need them.

The contractor must research and determine the VR service needs of youth and students with disabilities age 14-21 (up until their 22nd birthday), including but not limited to:

1. Their need for pre-employment transition services or other transition services; and
2. An assessment of the needs of individuals with disabilities for transition services and pre-employment transition services, and the extent to which such services provided under this part are coordinated with transition services provided under the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.) in order to meet the needs of individuals with disabilities.

The contractor will be required to show NYSCB the methodology(ies) used to:

- identify youth and students with disabilities (age 14-21),
- determine the amount of funds necessary to make the required Pre-ETS available statewide to all eligible youth and students with disabilities (age 14-21), and
- show funds remaining to provide additional authorized activities.
The contractor will need to obtain the information needed to complete this evaluation. NYSCB is aware that some of this information can be obtained from the New York State Education Department (NYSED) and the NYS Resource Center (NYSRC) however, these two resources are a starting point for the data. The contractor will need to include the numbers of students with disabilities receiving services under both IDEA and 504 plans. It is also important to note that NYSCB provides services to children (under the state funded children’s program) and many of them will be determined eligible for vocational rehabilitation services in the future.

**Study #5—Reasons for Participants’ Unsuccessful Exit from the VR Program**

Unsuccessfully exiting the VR program means the participant has either exited before a plan for employment was developed, or after a plan was developed but before the employment goal was obtained. The contractor will conduct a telephone survey of NYSCB participants who have exited the VR program unsuccessfully. The purpose of this evaluation is to determine what factors contributed to the participants’ unsuccessful exit from the VR program and is the level of engagement of participants a factor which can contribute to someone exiting unsuccessfully.

NYSCB anticipates that information obtained from the telephone survey will consist of both qualitative and quantitative information. The questions used in the telephone survey will be a mix of open and closed ended questions, which may include but are not limited to:

- Did you meet with your counselor in person or by telephone; at intake or first meeting?
- Did you meet with your counselor in person after intake or during the process?
- Did you participate in the process of determining your vocational goal or developing your career path?
- What were the reasons for closure? NYSCB can provide the list of possible closure reasons.
- Were you receiving benefits of any kind at the time you were receiving services? If yes, NYSCB can provide a list of possible benefits.
- If yes, you were receiving benefits at the time you were receiving services, did you believe that working would negatively impact your benefits?
- Were you offered benefits advisement?
- Were you under 25 when you started receiving services?
- Were you under 25 when you exited the program?
- How long did it take to develop your IPE?
- Did you sign your IPE soon after it was developed?
- If you are under 25, did you participate in any programs or activities related to picking a college or a career?
- Did you feel you had enough support with job search related activities such as resume preparation, practice interviewing and job searching.
- Was your counselor easy to talk to? Did they reach out to you often?
- Would you have liked them to reach out more or less?

**Note: the final list of questions will be developed in consultation with the chosen contractor.**

NYSCB anticipates the sample size will be the number of participants who have exited the VR program unsuccessfully during an 18-month time period, which is estimated to be approximately 682 participants, consisting of 658 participants in status twenty-eight closure (closure after an individual plan for employment was developed) and 24 participants in status thirty closure (closure before an individual plan for employment is developed).

The directory of MWBEs can be viewed at: https://ny.newnycontracts.com. OCFS will request any necessary completed MWBE documents from the contractor during the contract development process.
