Alcohol During Pregnancy can create a lifelong brain that...

- Has trouble moving information from one situation to another
- Thinks in a disorganized way
- Has difficulty with time and money
- Forgets information
- Can’t link cause and effect
- Responds slowly
- Uses poor judgment
- Can’t read the emotions or body language of others

She’ll be glad she did!

Most women stop drinking as soon as they find out they are pregnant...but alcohol can hurt a unborn baby’s developing brain even before a woman knows she is pregnant!

Tell my MOM, Nine months...No Alcohol!
