2019

Family First Prevention Services Act (FFPSA) Foster Home Data Packet

This FFPSA Foster Homes Data Packet is designed to support LDSS and voluntary agency efforts to analyze the current foster boarding home population to inform foster home recruitment and retention strategies.

County Data Packet

The foster home data contained in this packet includes all foster homes associated with your county and, unless overridden, are located within the county boundaries. These foster homes may be supported by the LDSS or a voluntary agency. These homes may foster children served by your LDSS or children from other counties.

Note: An Excel file with a list of all of the homes referenced in this data packet is available upon request. Claire.Strohmeyer@ocfs.ny.gov

Table of Contents

OCFS has prepared data packets for every NYS OCFS region, LDSS, and Voluntary Agency with ten or more foster homes that were open on 12/31/2019.

Outcomes for Children in Family-Based Foster Care.....	p.2
Family First Goal, NYS Targets, and Local Performance	p.2
Data Quality Check	p.3
Foster Home Openings, Closings, and Open at End of Year	p.3
Foster Home Demographics.....	p.4
Family/Sibling Groups	p.4
Race/Ethnicity of Foster Parent 1	p.5
Active Foster Homes	p.5
Therapeutic Foster Homes	p.7
Median Length of Service	p.8
Foster Home Utilization and Transfers.....	p.9
Experience Fostering Teens	p.9
Utilization of New Foster Homes	p.11
Placement with Family/Sibling Groups	p.11
Transfers from Foster Homes	p.12

Unless otherwise noted, the data source is the OCFS Foster Home Spell File, a longitudinal foster home file prepared by Chapin Hall Center for Child Welfare Data. Data was extracted from CONNECTIONS on 1/31/20.

Washington

Family First Goal: The primary goal of FFPSA is to keep children safely at home with their families and, when that is not possible, to utilize the least restrictive placement appropriate for the needs of the child.

Targets: OCFS has established a statewide goal that by September 30, 2021:

- ◆ A maximum of 12% of children in foster care will be in congregate (institution/group care) and
- ◆ A minimum of 50% of children in foster care will be in kinship foster care

What is your current performance in relation to the NYS targets?

Washington	Foster Boarding	Kinship Foster	Institution/Group Care	Trial Discharge	SILP/Other	Total In Care
2015	26	1	8	3	0	38
2016	34	8	14	0	0	56
2017	29	7	3	6	4	49
2018	29	3	7	1	2	42
2019	13	8	9	1	2	33

Are you at or near the institution/group care and kinship foster care targets?

Are you trending towards the targets? If so, what are the effective strategies you can build on? If not, what strategies may you employ to improve?

*Technical Notes: **Kinship foster home** counts include all children in 24-hour care and/or temporary absence status living with a foster parent recognized as a relative or kin by NYS regulations, regardless of home type. In New York State, foster homes can be established through multiple regulatory pathways. Homes designated as an approved relative home under 18 NYCRR 433.1 may only care for children with a qualifying relationship to the foster parent; homes designated as a certified foster home may care for either related or non-related children. Prior to 2020, NYS regulations defined a relative as someone “within the second or third degree of consanguinity to the parent(s) or stepparent(s) of the child”. In 2020, regulation changes expanded the definition of relative/kin to include: (1) an adult who is related to the parent(s) or stepparent(s) of a child through blood, marriage or adoption to any degree of kinship; (2) an adult with a positive relationship to the child or child’s family including but not limited to a child’s godparent, neighbor, family friend; or (3) an unrelated person where placement with such person allows half -siblings to remain together in an approved foster home, and the parents or stepparents of one of the half -siblings is a relative of such person.

Institution/group care includes all children living in an agency operated boarding home, group home, group residency, or institutional setting (e.g. 12/31/19). Children living in supervised independent living programs are not included in this category.

Source: Data Warehouse Family First Prevention Services Act; Outcome Monitoring Report

A District-level performance report can be found on the NYS OCFS website's FFPSA Data and Resources page.

Look for the FFPSA Outcome Monitoring Report at:

<https://ocfs.ny.gov/main/sppd/family-first-data.php#h3-goal-monitoring>

Washington

Data Quality Check

Does the number/percent of children placed with kinship resources (on previous page) align with your District's internal data?

The data is pulled from CONNECTIONS; if your internal data shows different outcomes, it may be an issue related to data input.

If you believe this data under-counts the percent of children living with relatives, we recommend two next steps:

1. Understand and calculate your region's actual utilization of kinship foster care.
 - a. Obtain a list of children in foster care in your LDSS (download the **Family First Outcome Monitoring Detail** report from Data Warehouse). If you are unable to pull this report from Data Warehouse, contact your OCFS Regional Office liaison and request a copy.
 - b. Review the list and make note of children that you identify are placed with kin, but the report shows another placement type.
2. Check to confirm that the placement type is accurately documented in CONNECTIONS.
 - a. Children placed with kin in a certified or foster/adoptive home should be documented in the CONNECTIONS Activities Window. For more information, refer to 18-OCFS-ADM-03 (Revised).

Foster Home Trends:

Represents Any Foster Home Located within LDSS Jurisdiction

Foster Home
Openings, Closings and Open at End of Year

Are the total number of your foster homes increasing or decreasing over time?

Is your net gain or loss due to more foster home openings or more foster home closures?

Do you have a sufficient number of foster homes to meet the need? *Note: The number of children in care can be found in a predefined Data Warehouse report within the Family First folder. If your District is seeking to place one family in one foster home, an estimate of the number of families in care can be found on the following page.*

Washington

Families (Family/Sibling Groups) In Foster Care on 12/31/19

One Family, One Home is about placing children from one family together in one foster home with no other unrelated children. This is a component of NYC Administration for Children's Services "Home Away From Home" initiative. "The One Family, One Home approach has many advantages: keeping siblings together, reducing stress on children and caregivers, improving placement stability, and other child welfare outcomes. One Family, One Home requires maintaining a family foster care pool of relative and nonrelative caregivers that is large enough to accommodate the number of family groups in foster care." (Ross, T., PhD, Gerer, L., MA, & Pang, Y. C., PhD. 2019. Home Away From Home. Lessons Learned for Building a One Family, One Home Foster Care System. p.4.)

How many **families** (children with the same case ID) were in foster care on 12/31/2019?

When estimating the number of foster homes needed, consider how many family groups are expected to utilize foster homes. The point-in-time data below will give you an idea of the number of sibling groups who may need foster care and therefore, support projection estimates.

Family Size	Total # of Family Groups in care on 12/31/19	Number of Families if 12% of Youth in Foster Care were Placed in Congregate Care	
1	19	17	← Assume all 12% of children in congregate care are a family with one child. (The number in this cell represents the number of families with one child that would be estimated to need foster home(s). It is 12% fewer families with one child.) ← If 12% of the children entering foster care are placed in congregate care, how many foster homes are needed for One Family, One Home?
2	3	3	
3	0	0	
4	2	2	
5	0	0	
6	0	0	
7	0	0	
8	0	0	
10	0	0	
Total	24	22	

Families (Family/Sibling Groups) In Foster Care on 12/31/19

**What is your District's placement practice?
What percent of foster homes were fostering one family group?
(One Family/One Home)**

Statewide, 81% of foster homes utilized on 12/31/2019 were fostering one family group.

Washington

Race/Ethnicity of Foster Parent One

Does the race and ethnicity of foster parents align with the children entering and in foster care? Note: The race and ethnicity for children in foster care in your District is available in a predefined report within OCFS' Data Warehouse. The "Children In Care by Status" report is located in the Family First" folder, which is in the "Child Welfare Services" folder. If you need assistance locating the report, contact your OCFS regional office.

Race: Foster Parent One for Homes Open on 12/31/2019

When two foster parents are listed, the female is parent one.

Ethnicity of Foster Parent One

Active Foster Homes

Active Foster Home: A foster home is considered "active" if the parents have fostered within the last six months of 2019 (the data in this packet is as of 12/31/19.)

(Inactive homes did not foster any children between 7/1/19-12/31/19.)

34 Foster Homes were open at the end of 2019. Of those homes, how many were active?

Note: Statewide, **81%** of foster homes are active.

Foster Homes on 12/31/19
Active and Inactive

How does your District's percentage of active homes compare to statewide?

What are the characteristics of your inactive homes? (Use individual-level foster home file.)

What is your process for supporting foster homes to maintain them as active?

Are there opportunities to bring inactive homes into active status?

Washington

Which Parent Agencies have Active/Inactive Foster Homes?

Table (below) provides the names of the parent agencies for the foster homes associated with your District.

Review the list of parent agencies, below, that recruit and support the foster parents that are associated with your District.

Important: Some of the foster homes in the agencies listed below may not be available for children in your District's care and custody. Are there any easily identifiable foster homes that are probably **not available for the children in your custody**? (For example, foster homes that were recruited by agencies geographically out-of-area for children in your county.)

Remember that children may be placed with a kinship resource in either a certified foster home/foster adoptive home or an approved relative home. The data below includes all foster boarding type homes.

If you identified homes that you believe are not available for the children in foster care in your county, remove (subtract) those homes from your total number of active, likely available homes.

Parent Agency Name	Active	Inactive	Total Foster Homes
Berkshire Farm	19	6	25
Northeast Parent & Child Soc	4	3	7
Parsons Child & Family Center	1		1
Warren County DSS	1		1
Total Foster Homes	25	9	34

Washington

Active Therapeutic Foster Homes Associated with County

25 Foster Homes, that were open on 12/31/19 are considered "Active". This may represent a more accurate count of *available* foster homes.

Of those active homes, how many were **therapeutic**? Note: Statewide, **30%** of active homes are therapeutic.

Active Foster Homes on 12/31/19
by Therapeutic Designation

What are the outcomes for those homes?

(to answer these questions, use the foster home level file)

Do children leave therapeutic foster homes to permanency more often than to moves (lateral or step up)?

Do therapeutic foster homes have a longer or shorter length of service?

What are the characteristics of children placed in therapeutic foster homes?

Which Parent Agencies have Active/Therapeutic Foster Homes?

Table (below) provides the names of the parent agencies for the foster homes associated with your region.

Review the list of parent agencies, below, that recruit and support the foster parents that are associated with your county. Note: A foster home is listed as therapeutic if it was therapeutic at any time during this current foster home episode. Foster homes may transfer from one parent agency to another within their foster home episode.

Parent Agency	Active/ Non Therapeutic	Active/ Therapeutic	Total Active Foster Homes
Berkshire Farm		19	19
Northeast Parent & Child Soc		4	4
Parsons Child & Family Center		1	1
Warren County DSS	1		1
Total Active Foster Homes	1	24	25

Washington

Median Length of Service:

The median length of service gives us information about how long foster parents serve. It is a calculation that represents the time it takes for half of the foster parents to leave foster parenthood. For example, if 100 new foster parents were certified in 2018, and half of them (50), left service in 18 months, then the 2018 median length of service is 18 months.

The individual foster home file provides information on the foster parent's length of service and their characteristics.

What is your agency's median length of service?

How does it compare to NYS's foster home median length of service?

Does the median length of service differ based on foster parent characteristics and experiences?

Median Length of Service in Months

Median length of Service for all foster homes opened between 1/1/16 and 12/31/18

Foster Home Characteristic	Washington	New York State
All Foster Homes	21.4	19.5
All Therapeutic Foster Homes	23.0	20.7
Foster Homes that fostered teens two or more times	25.4	25.4

Note: If you are interested in the median length of service for other cohorts, this can be calculated using the individual foster home file.

If you have varying lengths of service, what are some questions you might ask?

Examples:

Are those with a short length of service relative homes with the intention of fostering once?

Statewide, foster parents who foster teens repeatedly tend to have a longer length of service, why? Are there additional supports we provide to those parents that could be replicated with other foster parents?

Note: The length of service observes the foster home's Resource Identification Number through closure, regardless of certifying agency. Foster home is certified/approved on an annual basis, and due to various reasons, some homes may have a certification lag. In order to adjust for this, if a home has a lag of less than three months, then, for purposes of this data packet, the certification/approval is "bridged", allowing for a length of service calculation that is more representative of the foster parent's practical length of service.

Washington

Foster Home Utilization

What percent of foster homes ever fostered a child in NYS's foster care system?

Experience Fostering Children (any age) in NYS Foster Care System

Number of Homes Open on 12/31/2019 in this jurisdiction: 34

Of All Homes Open on 12/31/19, the number/percentage that have ever Fostered a Child in the NYS Foster Care System

Statewide, **89%** of all homes open on 12/31/19 had fostered a child (any age) at least once. How do you compare? What might be some reasons your percent is higher/lower than the NYS rate?

Foster Homes where Teens were Placed

When analyzing your District's data, consider if there are a sufficient number of new and existing foster homes to meet the anticipated demand, post FFPSA implementation.

Homes Open on 12/31/2019: Number and Percent of Homes that Accepted a Teen Placement

Of All Homes Open on 12/31/19, the number/percentage that Accepted a Teen Placement in the NYS Foster Care System

Statewide, **37%** of all homes open on 12/31/19 had accepted a teen one or more times. How does your jurisdiction compare? What might be some reasons your percent is higher/lower than the NYS rate?

Washington

Foster Homes that were Ever Open: Experience with Teen Placements

The number of homes open on 12/31/19 do not represent all foster homes *ever* open; some homes that were open, have closed before 12/31/19.

For recruitment purposes, a jurisdiction might ask: "Of all the homes that we opened during a time period, how many of them accepted teen placements?". The graph below shows the percent of foster homes that opened during the year, that accepted a teen placement on more than one occasion during their foster parenthood experience.

Note: This is a count of foster homes that accepted teen placements on two or more occasions during the foster home spell that began during the year. Some homes may have fostered more teens during other foster home episodes. Refer to the foster home level file for additional information.

Statewide, the 5-year rate is 10.3%.

Critical Thinking: You may notice that fewer homes that opened in 2019 have accepted teen placements. Research shows that foster parents who successfully foster teens generally have more fostering experience prior to their first teen fostering experience, therefore, we are less likely to see new foster parents taking teens. (Ross, T., PHD, Gerber, L., MA, & Pang, Y. C., PHD. (2019). Home Away From Home. Lessons for Building a One Family, One Home Foster Care System.)

Washington

Utilization of New Foster Homes

The first three months of certification is an important time. If a foster home does not foster a child within their initial three months of certification, they are much less likely to ever foster a child.

Statewide, according to the data, approximately **79%** of foster homes are fostering a child within the first three months of certification/approval.

Time Between Foster Home Opening and First Child Placed
(All Homes Open on 12/31/19)

Placement with Siblings

Rationale: "Children entering foster care must be placed with their siblings or half-siblings, unless doing so could jeopardize the health, well-being, or safety of one or more of the children in the sibling group."¹

Sibling Groups in Foster Care on 12/31/19 Placed Together
by Sibling Group Size

Source: 2019 Monitoring and Analysis Profiles with Selected Trend Data: 2014-2019.
<https://ocfs.ny.gov/main/reports/maps/>

Note your Current Performance

What percent of sibling groups of 2 are placed together (intact)? Statewide 73%

What percent of sibling groups of 3 are placed together? Statewide 59%

What percent of sibling groups of 4+ are placed together? Statewide 31%

Do you believe this is an area needing focus? If so, what are some theories about why siblings are separated?

¹ New York State Office of Children and Family Services Foster Care Practice Guide for Caseworkers and Supervisors, Pub. 5202 (01/19); Chapter 4: Foster Care Placement Options, Page A-1.

Washington

Transfers From Foster Homes

"Children need consistency, predictability, and attachment to a caring adult to thrive. Multiple placements have been found to lead to delayed permanency outcomes, academic difficulties, and struggles to develop meaningful attachments". (Rutter, M., & Sroufe, L. A. (2000). Developmental psychopathology: Concepts and challenges. Development and Psychopathology, 12(3), 265-296.)

Note: Statewide, 47% of homes open on 12/31/19 had at least one transfer from the home to another placement type. The predominate transfer type statewide is a **lateral** move from one foster home to another. A breakdown of the type of transfers can be found in the individual foster home file.

If many foster homes have multiple transfers, it points towards a potential systemic issue (i.e.: placement decisions, foster home training or support). If the transfers are from only a few foster homes, it may be indicative of home-specific issues. Which is the case in your District?

Number of Foster Homes with Transfers to Another Placement Type, Grouped by Number of Transfers
(for homes open on 12/31/19 that fostered children)

What is the process for matching children to foster homes?
Are there any characteristics that homes with similar experiences have in common?
What is the level of support for these homes?
(Consult the individual-level foster home file for this information.)

Estimated Capacity vs. Estimated Need, by County on 12/31/19

Est. Capacity: Number of foster homes associated with jurisdiction regardless of foster home parent agency.

Est. Need: Number of family groups (children with shared case ID) expected to need foster homes if Family First targets are met.

Local Department of Social Services	A. Total Number of Active* Foster Homes <u>Associated</u> with the County (regardless of parent agency; some homes may not be available to the district)	B. Total Number of Children In Care on 12/31/19	C. Number of Family Groups In Foster Care on 12/31/19, less the 12% FFPSA congregate care target	D.
