# Question 1: Rate of Children Reported to CPS

**Question:** How many children are reported to CPS? How many have a substantiated allegation in at least one indicated report?

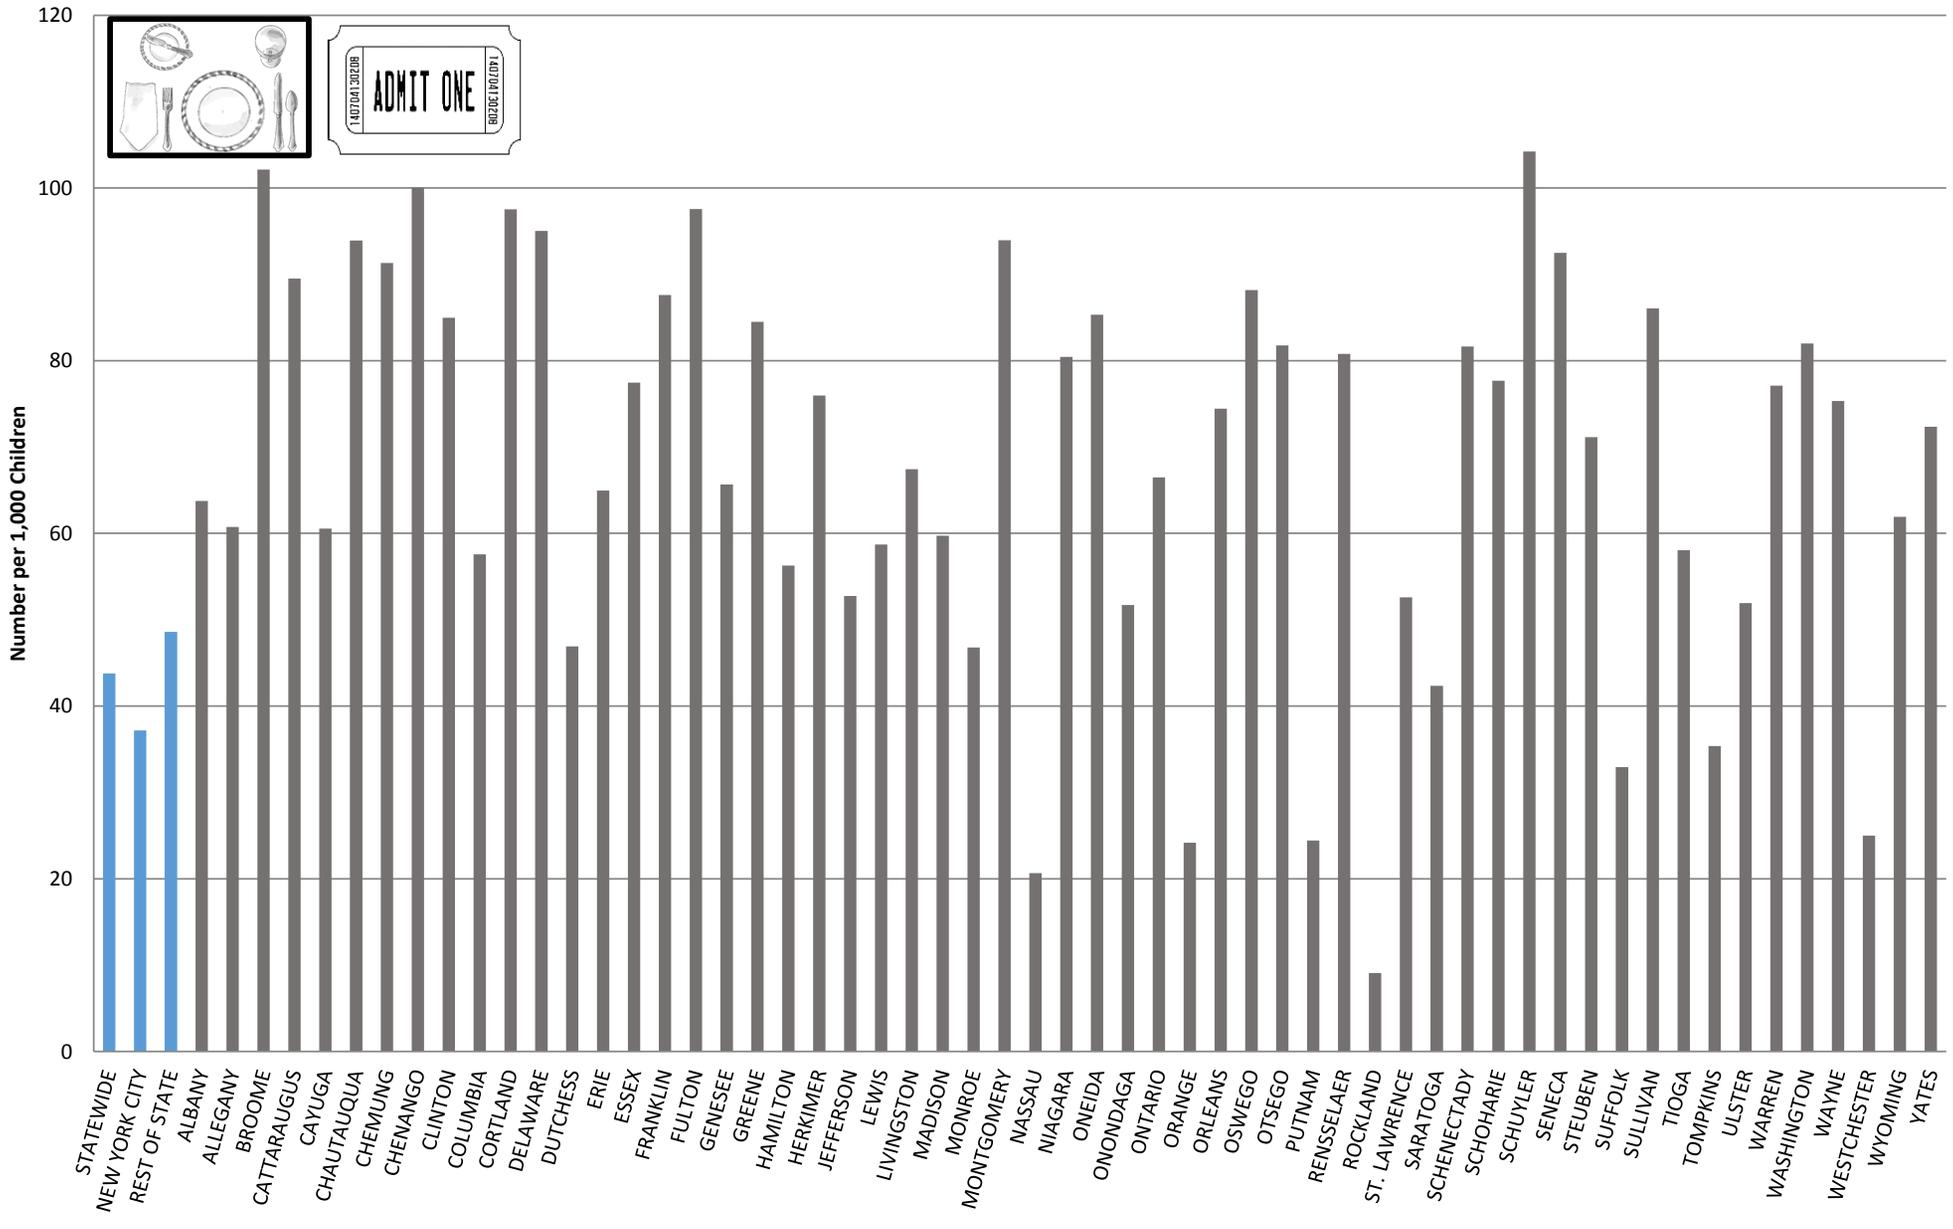

**Answer:** In 2016, for every 1,000 children statewide, 43.8 were named as an alleged victim of abuse/maltreatment in at least one CPS report (Figure 1a). For 14.5 children out of every 1,000 children allegations were substantiated (Figure 1b).

## Things to Consider:

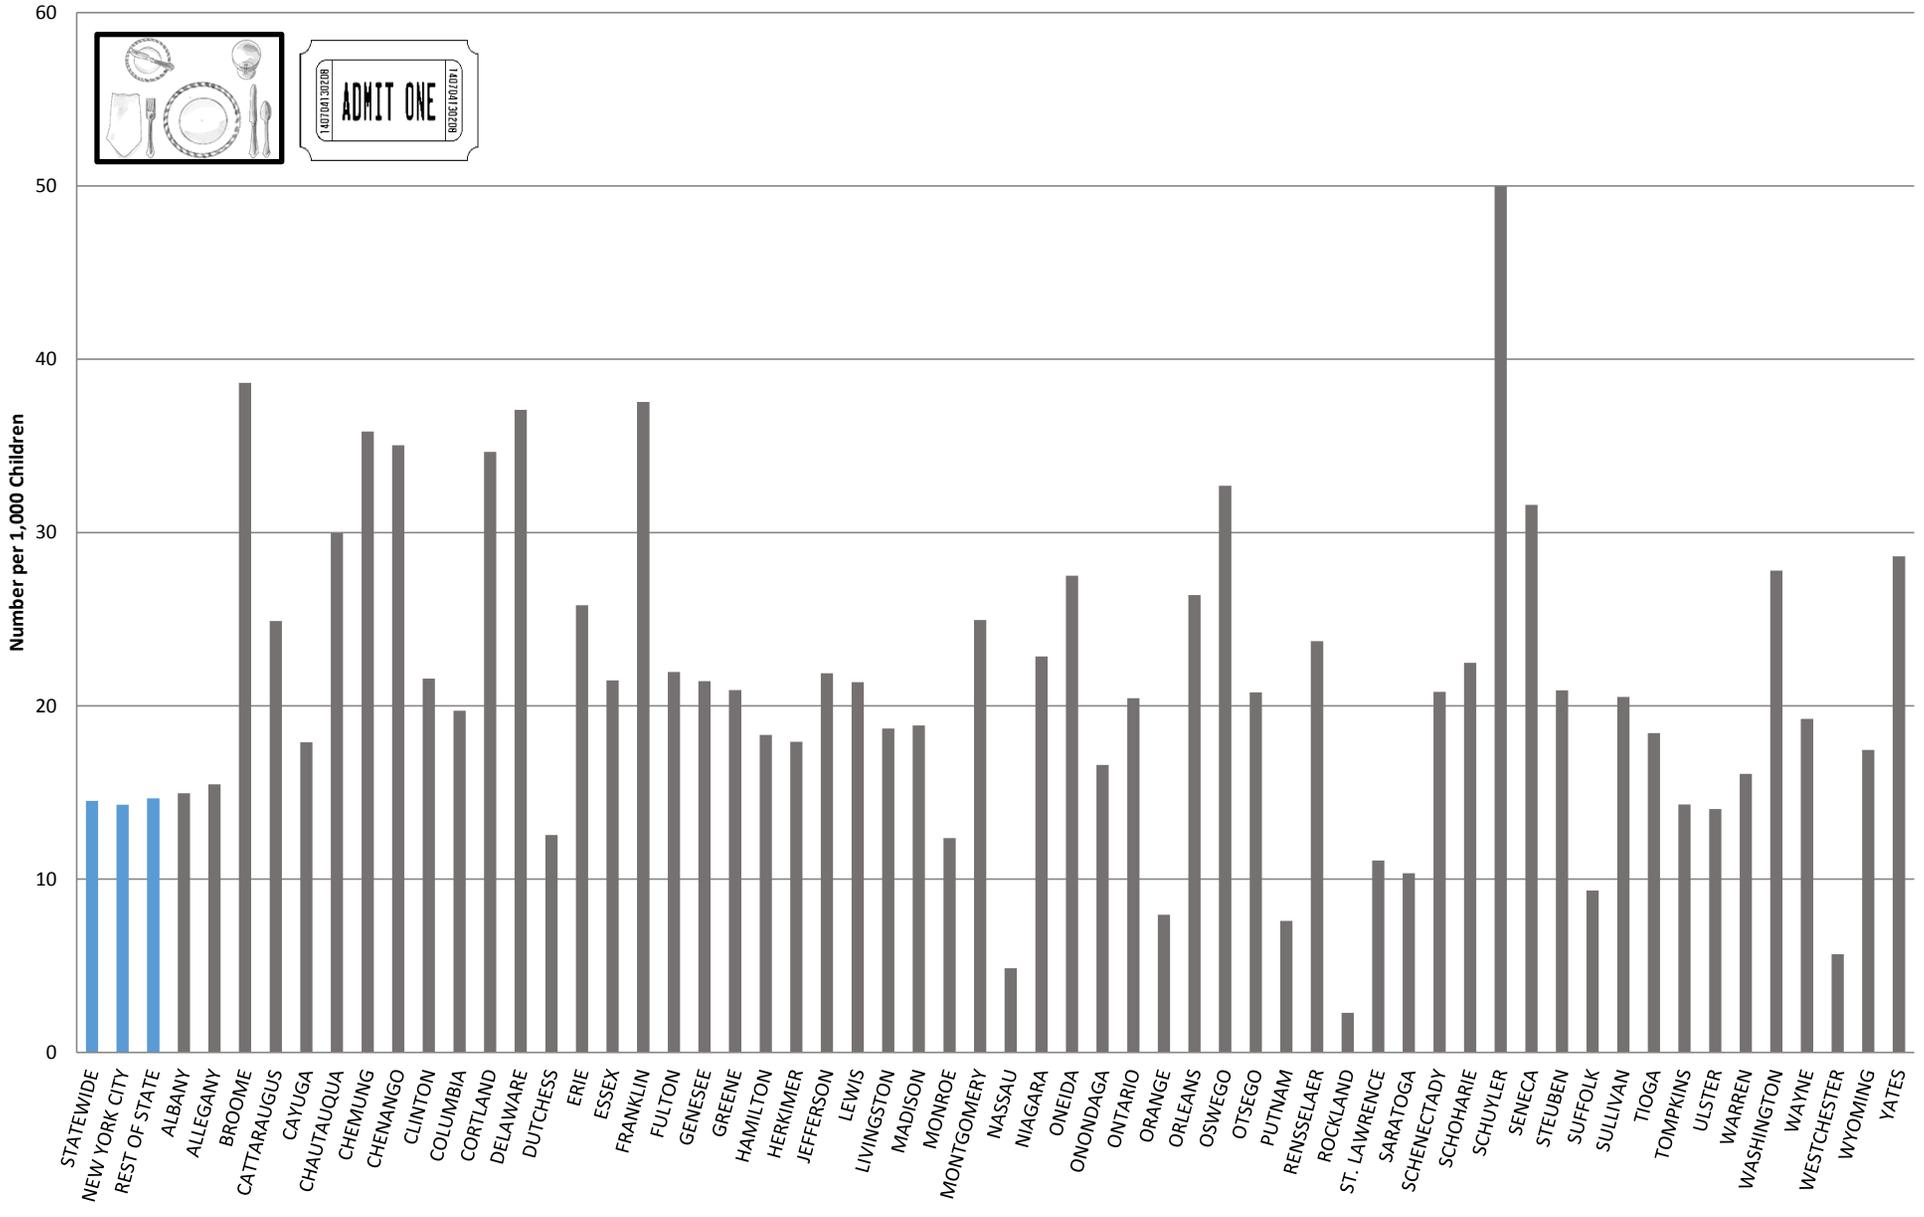

- How do the rates shown in Figures 1a & 1b compare to each other? Is your district's substantiation rate significantly less than or close to the report rate? Why?
- How does your rate of preventive service openings per child (Figure 2) compare to your rates of CPS involvement (Figures 1a & 1b)?
- Analysis Tip: This will differ from the counts in MAPS because this calculation is based on a count of children and not reports.
