

2017 BRIGHT SPOTS DATA PACKAGE PREVENTION

NOTE: This document contains one chapter of the 2017 Bright Spots package. More information regarding how to use and interpret the figure and tables contained here can be found in the complete 2017 Bright Spots package and technical appendix available at http://ocfs.ny.gov/main/Professionals_data_reports.asp or by emailing data.warehouse@ocfs.ny.gov.

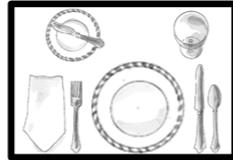

Prepared by:
Office of Children and Family Services
Bureau of Research, Evaluation and Performance Analytics
November 2017

**Office of Children
and Family Services**

Question 2: Rate of Children with Preventive Services Authorized

Question: How many children have preventive services, including both mandated and non-mandated services, authorized each year?

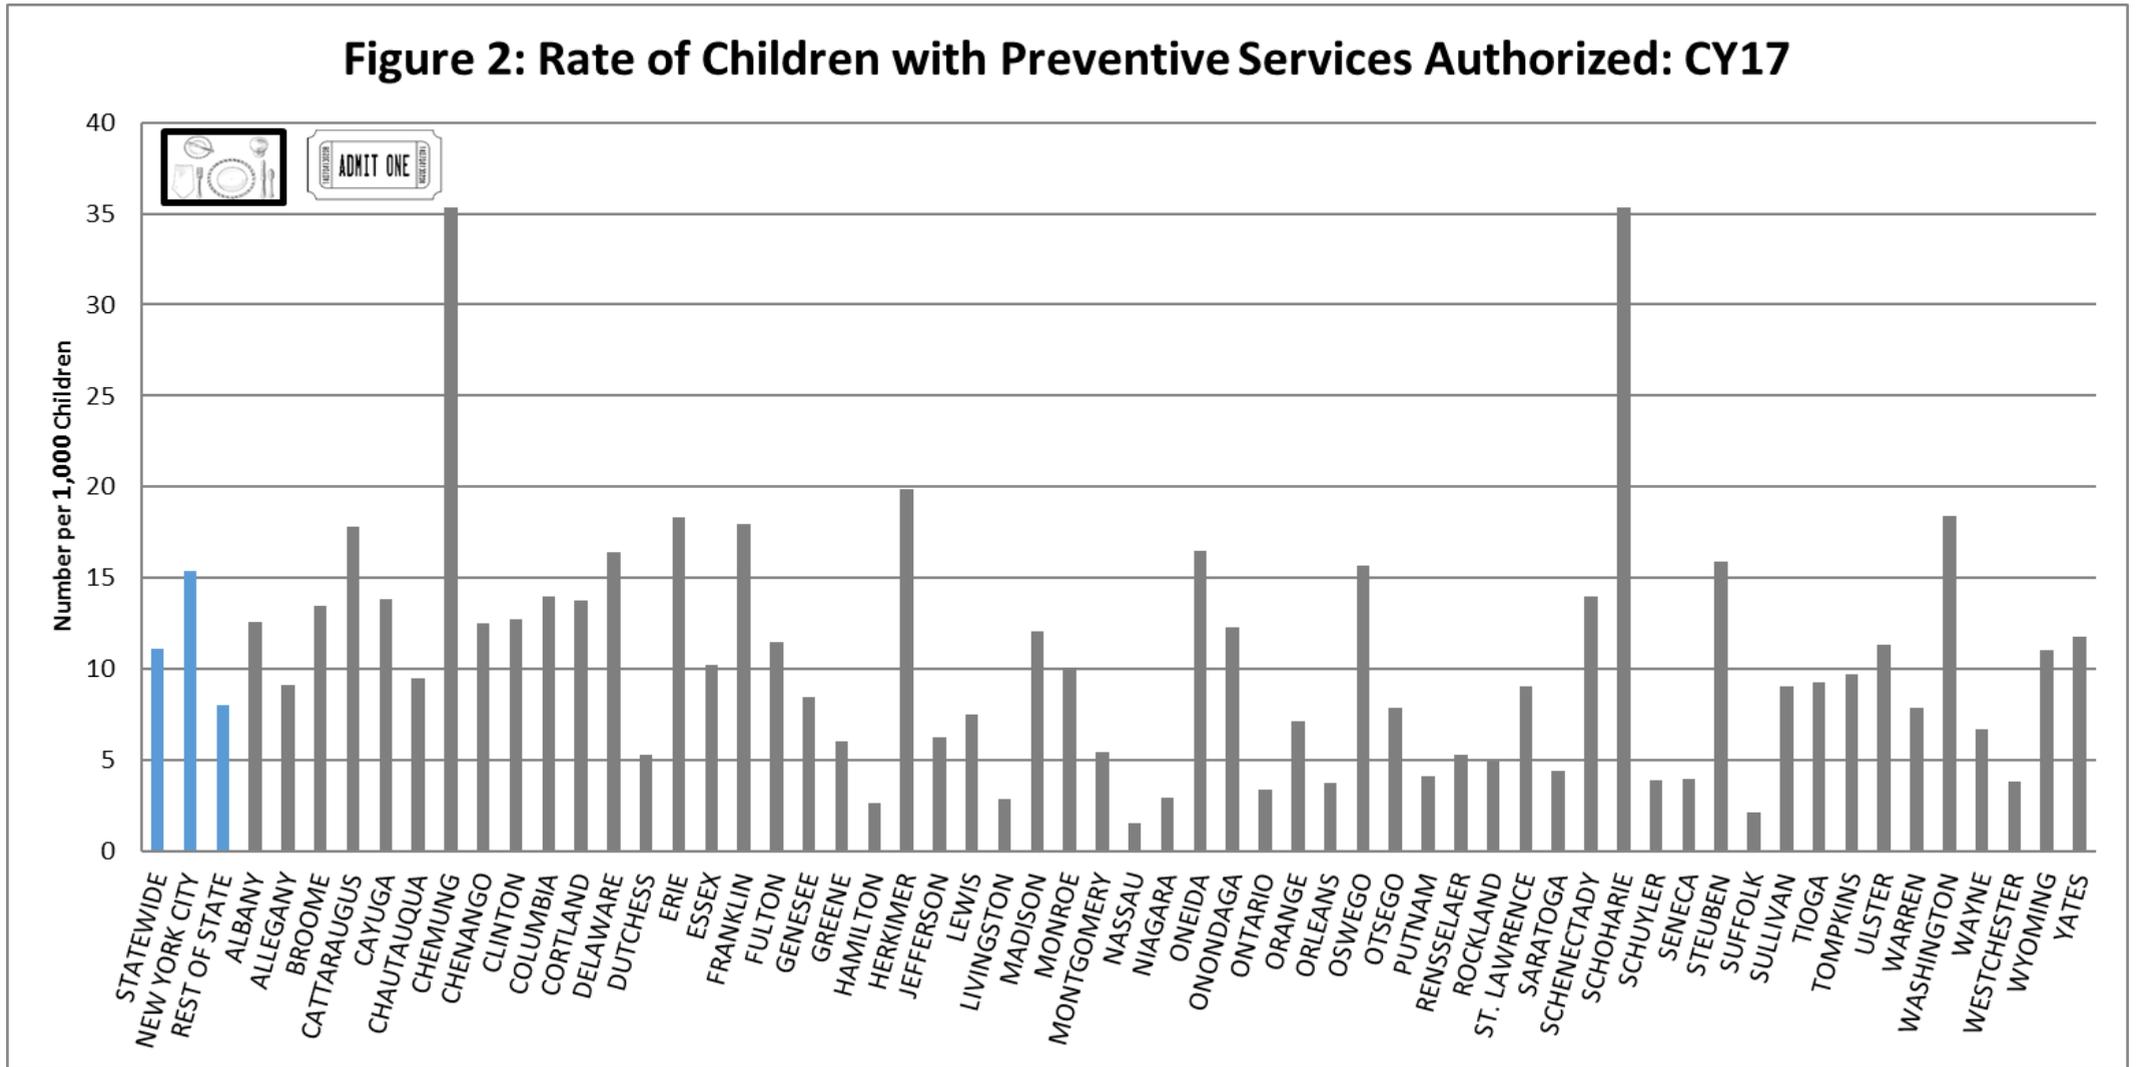

Answer: In 2017, approximately 11 out of every 1,000 children statewide were authorized to receive preventive services, including both mandated and non-mandated services. Rates varied across counties, ranging from a low of 1.5 to a high of 14.00 for every 1,000 children in the district.

Things to Consider:

- How often does your district connect families to services outside of a preventive case? To community-based preventive services?
- What factors determine whether or not preventive services are offered?
- How many of your preventive service authorizations are related to PINS/JD?
- Analysis Tip:
 - Presented rates are based on children served, not families. For example, if a single preventive case is open for a family of five (one parent, four children), all four children with preventive services authorized are counted in the presented rate.
 - Preventive services are defined using program choice as indicated in CONNECTIONS. This includes all children with preventive services newly authorized. Protective, foster care, and non-LDSS custody are excluded.

Figure 2: Rate of Children with Preventive Services Authorized: CY17

* St Regis cannot be calculated because Woods Poole population projections are not available.

Table 2: Rate of Children with Preventive Services Authorized Per 1,000 Children: CY17

Note: If a child had multiple preventive services authorized in 2017, the first service authorization record is used to calculate subsequent report.

Question 3: Children with Substantiated CPS Allegations Reported After Preventive Service Authorization

Question: What percentage of children experience a substantiated allegation within 12 or 24 months of their preventative service authorization?

Answer: Statewide, of the children who had preventive services authorized in 2016, 13.8% were victims of a substantiated incident of abuse/maltreatment within 12 months of their service authorization (Figure 3a). For children with a service authorization in 2015, 18.1% had a substantiated incident within 24 months (Figure 3b).

Things to Consider:

- See: # of Children with Preventive Services Authorized per 1,000 Children in District (Figure 2)
- See: # of Children with a Substantiated CPS Allegation per 1,000 Children in District (Figure 1b)
- How well do preventive services fit a family's needs? Are the services individualized? Are they offered on a long enough basis?
- How many of your preventive service authorizations are related to PINS/JD? How many of your substantiated allegations are coming after the preventive case was closed? Who is the reporter on these substantiated allegations? Are they mandated or non-mandated?
- Analysis Tip: Outcomes are child-based, not case-based.

Figure 3a: % of Children with Substantiated Allegations Reported Within 12 Months After Preventive Service Authorization: CY16

Question 4: Children Admitted to Foster Care after Preventive Service Authorization

Question: What percentage of children entering foster care within 12 or 24 months of their preventive service authorization?

Answer: Statewide, in 2016, 5.7% of children who had a preventive service authorized experienced a new foster care admission within 12 months of their case opening (Figure 4a). For children whose preventative service was authorized in 2015, 8.3% were admitted to foster care within 24 months (Figure 4b).

Things to Consider:

- See: # of Children with Preventive Services Authorized per 1,000 Children in District (Figure 2)
- See: # Children Admitted to Foster Care per 1,000 Children in District (Figure 7a)
- How well do preventive services fit a family's needs? Are the services individualized? Are they offered on a long enough basis?
- How many of your preventive service authorizations are related to PINS/JD?
- Analysis Tip: Outcomes are child-based, not case-based.
