Produced by the OCFS Bureau of Research, Evaluation & Performance Analytics

<sup>1</sup> 2014 detention data were extracted 5/28/16. These figures may not match those reported elsewhere if extracted on different dates due to data entry lag.

<sup>2</sup> Average Length of Stay (ALOS) in days is calculated for released youth only. LOS is determined by subtracting a youth's admission date from his/her release date. In the rare case that a youth is admitted and released on the same date, his/her LOS is set to one.

\*Percent change could not be calculated due to a zero count in the comparison period.

\*\*Percent change could not be calculated because zero youth were released in the most recent year and/or the comparison period.

Produced by the OCFS Bureau of Research, Evaluation & Performance Analytics

<sup>1</sup> Prior to 2014, race/ethnicity was classified by capturing one race category per youth. To facilitate cross-year comparison, youth with multiple race selections are recategorized into single categories by giving Hispanic and Black designations priority over White.

<sup>2</sup> Average Length of Stay (ALOS) in days is calculated for released youth only. LOS is determined by subtracting a youth's admission date from his/her release date.

In the rare case that a youth is admitted and released on the same date, his/her LOS is set to one.
