

Report Identification Number: AL-17-030

Prepared by: New York State Office of Children & Family Services

Issue Date: Mar 01, 2018

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 6 month(s)

Jurisdiction: Schenectady
Gender: Male

Date of Death: 09/27/2017
Initial Date OCFS Notified: 09/27/2017

Presenting Information

It was alleged that on 9/27/17 at 4AM, SM went into her 6-month-old son's (SC) room to change his diaper. While changing SC, SM noticed he was cold to the touch and his lips appeared blue. SC was not breathing. SM picked up SC and took him downstairs to MGM. 911 was called and SM started performing CPR per instructions of the 911 operator. SC was transported by EMS to the hospital and pronounced dead at 5AM. The home was cluttered but did not appear to have any safety hazards for SC or his 2-year-old SS. SC did not have any visible injuries or preexisting conditions. The cause of SC's death was unknown at the time and considered to be suspicious. MGM and 2yo SS had unknown roles.

Executive Summary

This fatality report concerns the death of SC that occurred on 9/27/17. The preliminary autopsy report listed the cause of death was SIDS. This was a healthy child with no prior medical concerns. CW assessed the SS to be safe on this day and at regular intervals during the investigation.

The investigation revealed that on 9/27/17, SM responded appropriately when she found SC unresponsive. SM called 911 and she and MGM performed CPR until EMS arrived. EMS then transported SC to the hospital. SM reported SC had a runny nose and mild congestion for 2-3 days prior to his death. EMS reported there were no obvious signs of trauma to SC and nothing abnormal. The SS was asleep in SM's bed. MGF also lived in the home but had been hospitalized at the time of the event.

BF did not reside with SM, but the two shared custody of the children. BF had seen the children that day and had no concerns. SM reported both children returned home that night and appeared happy and healthy.

CW offered both parents and all family members involved grief counseling and burial assistance. All services were declined. Both parents engaged in counseling on their own.

LE found no criminality in SC's death and no charges were filed at the time of this writing. LE was waiting for the final autopsy report to be completed before closing their investigation.

The family had no prior history with CPS and no record of involvement with LE.

Schenectady County Department of Social Services (SCDSS) completed all safety assessments and fatality reports on time, contacted appropriate collaterals, and obtained pertinent records from LE and medical professionals. SCDSS completed the 7-day and 24-hour safety assessments accurately. However, after multiple interviews with collaterals who denied the parents used illegal substances while caring for the children, this was not reflected in the last two assessments.

The allegations of DOA/Fatality and IG against SM regarding SC were unsubstantiated and the case was unfounded and closed. SCDSS had no reasonable cause to suspect SC's death was the result of any abuse or maltreatment.

Findings Related to the CPS Investigation of the Fatality

Safety Assessment:

- Was sufficient information gathered to make the decision recorded on the:
 - Approved Initial Safety Assessment? Yes
 - Safety assessment due at the time of determination? Yes
- Was the safety decision on the approved Initial Safety Assessment appropriate? Yes

Determination:

- Was sufficient information gathered to make determination(s) for all allegations as well as any others identified in the course of the investigation? Yes, sufficient information was gathered to determine all allegations.
- Was the determination made by the district to unfound or indicate appropriate? Yes

Was the decision to close the case appropriate? Yes

Was casework activity commensurate with appropriate and relevant statutory or regulatory requirements? Yes

Was there sufficient documentation of supervisory consultation? Yes, the case record has detail of the consultation.

Explain:

LDSS Response

On 9/27/17, SCDSS initiated their investigation by confirming the reported information with the source. There was one SS who resided with the SC. SCDSS notified the DA of SC's death and coordinated efforts with LE.

CW spoke with several members of LE who responded to SM's home on 9/27/17 per a 911 call regarding the unresponsive SC. LE did not report SM or MGM to appear under the influence of any drugs or alcohol. LE noted SC's crib contained a padded bumper surrounding the inside of the crib, a flannel blanket tucked in to cover the crib mattress, and a boppy pillow (U-shaped pillow) at one end of the crib with a stuffed animal sitting on top of it. SM reported she laid SC in the crib on his back with his head at the end opposite end of the boppy pillow. It's unknown what position SC was in when SM removed him from the crib. It's unknown if there was anything near SC's face that may have obstructed breathing.

CW spoke with several EMS workers who gave similar accounts of what they observed at SC's home. EMS arrived at the home on 9/27/17 at 4:03AM and reported finding SC blue and cold to the touch. EMS reported SM and MGM appeared sober and coherent. EMS did not observe obvious signs of trauma or anything abnormal. Since rigor had not yet set in, EMS thought SC had died within the past couple of hours. EMS attempted life saving measures and transported SC to the hospital at 4:29AM. The attending Dr. at the hospital said SC did not respond to any medical interventions and had no cardiac response. SC was given additional medication and CPR was continued. Dr. performed an ultrasound and there was no cardiac movement. The Dr. did not observe any signs of trauma.

An autopsy was completed on 9/27/17 and the preliminary cause of death was SIDS. ME found no obvious signs of trauma. SC was a healthy baby with no concerns. The final autopsy had not been issued at the time of this writing.

CW interviewed SM, MGM, MGF, BF, PGM, PGF, SM's boyfriend, BF's girlfriend, and a maternal aunt. There were no

concerns of drug/alcohol abuse by anyone caring for the children and no domestic violence in the home. SM and SF both reported they were taking medications for clinical diagnoses which did not affect their ability to care for the children.

CW obtained records from the hospital, pediatrician, ME, and LE. SC and SS were up to date with immunizations, well child exams, and there were no medical concerns for either child. LE had no records concerning either parent.

SCDSS had no reasonable cause to suspect SC was abused or maltreated and the investigation was unfounded and closed on 11/22/17.

Recommended Action(s)

Are there any recommended actions for local or state administrative or policy changes? Yes No

Action:	SCDSS completed the 7-day and 24-hour safety assessments accurately. However, after multiple interviews with collaterals who denied the parents used illegal substances while caring for the children, this was not reflected in the last two assessments. In this case, the error was in favor of the safety of the surviving child, so there is no requirement for submission of an improvement plan. However, it is recommended that SCDSS will review with staff the requirement to update safety assessments with information gathered during the investigation so they accurately reflect case circumstances at the time of completion.
----------------	---

Are there any recommended prevention activities resulting from the review? Yes No
