

Report Identification Number: BU-18-023

Prepared by: New York State Office of Children & Family Services

Issue Date: Jan 09, 2019

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 3 month(s)

Jurisdiction: Allegany
Gender: Female

Date of Death: 07/22/2018
Initial Date OCFS Notified: 07/23/2018

Presenting Information

The SCR report alleged on 7/21/18, around 10:00 PM, the father fed the 3-month-old SC a bottle, then brought her into bed with him. At 3:30 AM the mother arrived home to see the father and SC sleeping in bed together. The mother found SC deceased in the bed near pillows and a blanket. The parents called 911 and attempted CPR on the child. The ambulance arrived and continued CPR. SC was pronounced dead at the hospital on 7/22/18.

Executive Summary

Allegany County Department of Social Services (ACDSS) received a report from the SCR on 7/23/18, concerning the death of the 3-month-old female SC.

Through interviews conducted by LE and ACDSS, it was learned on 7/22/18 around 2:20 AM, the mother discovered the SC was pale and unresponsive in the adult bed behind the father. The mother yelled for help and the maternal grandmother and maternal uncle performed CPR and called 911. EMS arrived and transported SC to Jones Memorial Hospital, where she was pronounced deceased at 2:55 AM.

The mother, father and SC resided with the maternal grandparents, maternal great grandmother and the uncle, uncle's partner and their 2yo child. The mother and father had no other children and no SCR history was found. ACDSS assessed the home to be safe for the 2yo cousin and there were no concerns for the child's care.

An autopsy was performed by Olean General Hospital Department of Pathology. The manner of death was determined to be "accidental" and the cause of death was "positional asphyxia." The autopsy report listed a diagnoses of "history of unsafe sleep habits - patient sleeping in parent's bed with father" "no developmental anomalies" and "no evidence of trauma." The LE investigation concluded with no charges filed.

ACDSS conducted a thorough investigation and appropriately substantiated the allegations of DOA/Fatality and Inadequate Guardianship against the father. It was determined there was credible evidence that the SC was placed in imminent danger when the father consumed alcohol while acting as caregiver to the SC and utilized unsafe sleep habits when he placed her in the bed next to him, propped up on blankets, which likely contributed to her untimely death. The case was closed as the parents had no other children and the family declined all services offered.

LDSS Response

ACDSS initiated their investigation upon receipt of the report. They spoke to the source, searched SCR history and spoke to LE. It was learned the parents had no SCR history or surviving children and LE had already conducted interviews with all household members. All records pertaining to the interviews and photos of the home and SC were provided to ACDSS.

ACDSS conducted a home visit on 7/24/18, assessed the safety of the cousin and interviewed all household members. It was learned the SC was a healthy child who had no pre-existing medical condition. It was reported the SC always slept in the bassinet in the parents' bedroom at night and in the crib, bouncy seat or swing in the living room during the day. The family members reported on 7/21/18, they had a barbeque with several other family members and friends present throughout the day. Around 6:30 PM, the mother, grandmother and uncle's partner left the home to attend an event while the father, grandfather and uncle stayed home with SC and the 2 yo cousin. SC appeared healthy and to be acting normal when they left. Shortly after they left, the father fed SC a bottle and then pushed her around the yard in a stroller. Around 9:00 PM, the father brought SC inside the home and placed her in the crib in the living room, then returned outside for a few minutes. SC was "fussing" so he fed her oatmeal mixed with formula and a bottle of formula, then burped her and changed her. Around 10:00 PM the father brought SC upstairs and they both went to bed. The father reported he placed SC in her bassinet to sleep, although this statement conflicted with the location SC was found and the other family member's statements. The father reported he consumed 8 beers between 3:00 PM and 9:00 PM, although he and other family members denied he was impaired.

The three women returned to the home around 1:20 AM on 7/22/18 and the mother spent some time downstairs consuming

an alcoholic beverage prior to going upstairs. The mother entered the bedroom and could not locate SC in her bassinet. She found SC in the bed behind the father, who was laying on his side. SC was propped up on her back on top of blankets and she was pale and not breathing. The mother picked up SC, yelled for help and brought her into the grandmother's bedroom. The grandmother brought SC downstairs and she and the uncle performed CPR and called 911.

The family members reported no concerns for the parents' care of the SC and pediatrician records confirmed SC was healthy and up to date with well child visits and immunizations. LE and the pathologist reported no marks or bruises found on SC and LE felt the incident was accidental. Pediatrician and hospital birth records documented the parents were informed of safe sleep guidelines. During the investigation no concerns arose for the cousin, who was found to be healthy and well cared for.

ACDSS offered the appropriate bereavement counseling and funeral assistance services, although the parents declined. The case was appropriately indicated and closed as there were no surviving siblings.
