

Report Identification Number: SY-16-041

Prepared by: Syracuse Regional Office

Issue Date: Apr 18, 2017

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 3 year(s)

Jurisdiction: Cayuga
Gender: Female

Date of Death: 08/24/2016
Initial Date OCFS Notified: 08/24/2016

Presenting Information

The 3 year old SC was being treated for an unknown length of time for vomiting and a rash. The BM contacted the SC's pediatrician to schedule an appointment. Around 1 AM on the morning of the scheduled appointment, the BM and SC went to sleep in the same bed. At approximately 11 AM, the BM woke up next to the SC and discovered the SC had passed away. The BM contacted 911 and EMS and local LE responded, no arrests were made. The SC's 15 year old sibling was present and also resides in the home.

Executive Summary

On 8/24/16 the SCR received a report alleging that the 3 year-old SC was being treated for vomiting and a rash for an unknown amount of time. The SC's BM had made contact with the SC's pediatrician on 8/23/16 and had a scheduled appointment. At roughly 1 AM on 8/24, the BM and the SC went to sleep in the same bed. Just before 11 AM the BM woke up and discovered that the SC had passed away. The ME performed an exam and reported the cause of death as Diabetic Ketoacidosis and the manner of death as Natural. The ME also listed a contributory cause of death as Dehydration. According to medical records obtained by the LDSS the SC was not diagnosed with any condition. However, it is unclear how long the SC was vomiting and had a rash, and what treatment was being provided. The LDSS documented that the SC's pediatrician instructed the BM to take the SC to the ER if she was unable to get into the pediatrician by the end of the day on 8/23. It is unclear what efforts the BM made to get medical treatment for the SC, or what her condition was in the time leading up to her death.

The LDSS made appropriate collateral contacts with the pediatrician, LE, the ME, and First Responders. However, the information obtained was not adequate to determine what circumstances may have led to the death of the SC, though the ME determined that it was due to a previously undiagnosed condition. The LDSS adequately determined the SC's 15 year-old sibling to be safe and offered the BM and the SC's sibling a variety of services including grief and mental health counseling.

LDSS Response

The LDSS investigation showed that the SC passed away from natural causes due to a medical condition called diabetic ketoacidosis. The ME made this determination following an autopsy. The LDSS determined that the SC had not been previously been diagnosed with this condition, but according to the original SCR report the SC was being treated for vomiting and a rash. The LDSS investigation determined that the BM was treating the SC's diaper rash with ointment, but it is unclear what treatment was being provided for her other symptoms. The afternoon before the SC's death, the BM contacted the SC's pediatrician to schedule an appointment the next day, due to the SC presenting with flu like symptoms. The LDSS contacted the SC's pediatrician, who reported that he instructed the BM to either bring the SC in by 5 pm or take the SC to the ER. The BM did not take the SC to the doctor or the ER, and had an appointment for the next day. The LDSS did not document further details of the SC's symptoms prior to her death, and what medical treatment was sought by the BM. The LDSS determined that the BM had ensured that the SC attending regular checkups with her pediatrician, but there was little information regarding her health since the SC's last visit, or the SC's health around the time of her death.

The LDSS coordinated the investigation with LE, and made appropriate collateral contacts with the SC's pediatrician, first responders, and family members. The LDSS made multiple home visits and met with the BM and with the SC's surviving sibling. The LDSS made adequate contact with the surviving sibling, as well as collateral contacts and determined the SC's surviving sibling to be safe. The LDSS offered services to the family including, Crisis Services, assistance with burial arrangements and grief/mental health services.
