

## Report Identification Number: SY-22-044

Prepared by: New York State Office of Children & Family Services

Issue Date: Apr 03, 2023

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services had an open investigation or a CPS monitored services case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

## Case Information

**Report Type:** Child Deceased  
**Age:** 2 month(s)

**Jurisdiction:** Onondaga  
**Gender:** Female

**Date of Death:** 10/05/2022  
**Initial Date OCFS Notified:** 10/05/2022

## Presenting Information

The SCR report alleged that on 10/4/22, the mother fed the subject child and placed her in bed with the mother and father. The mother checked on the subject child at 1:45AM and found that she was not breathing. The mother immediately called 911 and was instructed to do chest compressions. The subject child was transported to the hospital where she was pronounced deceased at 2:58AM on 10/5/22. The mother and father had a bassinet for the subject child.

## Executive Summary

This fatality report concerns the death of the 2-month-old female subject child that occurred on 10/5/22. The SCR report contained allegations of DOA/Fatality and Inadequate Guardianship against the mother and father. At the time of her death, the subject child resided with her mother, father, and three siblings, ages 8, 5, and 3. The father of the 8-year-old sibling resided in a separate residence.

Onondaga County Department of Children and Family Services (OCDCFS) completed collateral and casework contacts and learned that on 10/4/22, the mother fed the subject child around 10:00PM and went to sleep in her adult-sized bed on her side, with the subject child in her left arm. The mother awoke around 1:45AM on 10/5/22, noticed the subject child was unresponsive and called 911. The mother attempted cardiopulmonary resuscitation efforts at the directive of 911 dispatch until emergency services arrived. The subject child was transported to the hospital, where she was pronounced deceased at 2:58AM.

An autopsy was performed, and OCDCFS obtained the final autopsy report prior to closing their investigation. The official manner of death was listed as undetermined, and the official cause was noted to be unknown, with extrinsic and intrinsic factors that made asphyxia death likely. Extrinsic factors included bedsharing in an adult bed with the mother, and intrinsic factors included premature birth at 30 weeks gestation with bronchopulmonary dysplasia and postmortem testing positive for Sars CoV-2 and rhinovirus/enterovirus with early interstitial pneumonia.

Bereavement services were offered on behalf of the family. The 8-year-old sibling was receiving non-therapeutic counseling through school, but his father would not allow him to participate in family counseling regarding the death of the subject child. The mother and father of the subject child were not engaged in counseling, as they did not want the 8-year-old sibling to feel left out. The Risk Assessment Profile did not reflect the mother and father's mental health and therefore was inaccurately scored. The case record did not reflect that OCDCFS interviewed the father specific to the circumstances surrounding the subject child's death. There was concern regarding supervision of the 8-year-old sibling; however, there was no documentation that this was further explored with the mother. The allegations were substantiated against the mother and father due to OCDCFS determining that there was a fair preponderance of evidence to state the mother and father put the subject child at risk by placing her in an unsafe sleeping environment. The siblings were assessed to be safe in the care of the parents. The case was indicated and closed on 1/24/23.

### PIP Requirement

This review resulted in a citation related to casework practice. In response, OCDCFS will submit a PIP to the Syracuse Regional Office within 30 days of receipt of this report. The PIP will identify what action(s) the OCDCFS has taken, or will take, to address the cited issue(s). For citations where a PIP is currently implemented, OCDCFS will review the plan(s) and revise as needed.

## Findings Related to the CPS Investigation of the Fatality

### Safety Assessment:

- Was sufficient information gathered to make the decision recorded on the:
  - Approved Initial Safety Assessment? Yes
  - Safety assessment due at the time of determination? Yes
- Was the safety decision on the approved Initial Safety Assessment appropriate? Yes

### Determination:

- Was sufficient information gathered to make determination(s) for all allegations as well as any others identified in the course of the investigation? Unable to determine - insufficient documentation.
- Was the determination made by the district to unfound or indicate appropriate? Yes

### Explain:

OCDCFS made an appropriate decision to substantiate the allegations based on evidence obtained throughout the investigation; however, the record did not reflect that the father was interviewed regarding the circumstances surrounding the subject child's death.

Was the decision to close the case appropriate? Yes

Was casework activity commensurate with appropriate and relevant statutory or regulatory requirements? No

Was there sufficient documentation of supervisory consultation? Yes, the case record has detail of the consultation.

### Explain:

Casework was not commensurate with case circumstances. The Risk Assessment Profile did not reflect the mother and father's MH diagnoses. The father was interviewed regarding questions related to risk assessment; however, was not interviewed about key questions relating to the circumstances of the fatality.

## Required Actions Related to the Fatality

Are there Required Actions related to the compliance issue(s)?  Yes  No

<b>Issue:</b>	Adequacy of Risk Assessment Profile (RAP)
<b>Summary:</b>	The Risk Assessment Profile did not reflect the parents' mental health, despite the case record noting that both parents had mental health diagnoses and were prescribed medication. The SF was engaged in mental health services prior to the fatality.
<b>Legal Reference:</b>	18 NYCRR 432.2(d)
<b>Action:</b>	OCDCFS will consider all risk elements identified throughout the course of the investigation and accurately document such elements into the Risk Assessment Profile.
<b>Issue:</b>	Adequacy of face-to-face contacts with the child and/or child's parents or guardians

<b>Summary:</b>	While the record did reflect that the SF was interviewed face-to-face regarding risk assessment questions, there was no documentation that the SF was interviewed about circumstances surrounding the fatality.
<b>Legal Reference:</b>	18 NYCRR 432.1 (o)
<b>Action:</b>	OCDCFS will make face-to-face contacts with a child and/or a child's parents or guardians, or activities with the child and/or the child's parents or guardians, which may include but are not limited to facilitating information gathering and analysis of safety and risk factors and determining the allegations.
<b>Issue:</b>	Determination of Nature, Extent and Cause of Conditions (Report)
<b>Summary:</b>	OCDCFS was made aware of a concern that the 8yo SS was walking to the store unsupervised; however, the record did not reflect that this concern was further explored or addressed with the SM.
<b>Legal Reference:</b>	18 NYCRR 432.2(b)(3)(ii)(d)
<b>Action:</b>	OCDCFS will address new concerns as they arise with all applicable caregivers, in an effort to determine whether the action(s)/inaction(s) constitute as abuse or maltreatment.

### LDSS Response

Upon receipt of the SCR report, OCDCFS coordinated their investigation with law enforcement, spoke with collateral sources, completed a CPS history check, and conducted a home visit.

OCDCFS interviewed the SM and learned that on 10/4/22, the SM fed the SC for the last time around 10:00PM and went to sleep with the SC in her left arm. The SM reported she was lying on her side facing the wall, and the SC was on her right side facing the SM. There was a comforter on the bed, but the SM stated it was not pulled up near the SC. The SM awoke around 1:45AM on 10/5/22 and noticed the SC was limp. The SM tried to wake the SC; however, observed that the SC was not breathing and called 911. The SM reported the SC was in the same position as when they had gone to sleep but that the SM had woken up to roll over when she noticed the SC was unresponsive. The SM reported the SF was in bed and sleeping on the other side of the SM at the time of the incident and aware that the SM was co-sleeping with the SC. EMS responded to the home and attempted life-saving measures but were unsuccessful, and the SC was later pronounced deceased at the hospital.

During a home visit, OCDCFS observed safe sleep provisions for the SC, including a bassinet; however, the bassinet had baby clothes and supplies in it at the time. The SM reported that she regularly co-slept with the SC, as the SC would not sleep for long durations of time unless she was held. The SM and SF confirmed they were aware of safe sleep guidelines prior to the fatality.

OCDCFS learned during their investigation that the SC was born at 30 weeks gestation and remained in the Neonatal Intensive Care Unit until her discharge on 9/19/22. The SC needed oxygen and a feeding tube after birth. The SM reported the SC had experienced apnea during feedings and was last seen by her pediatrician on 10/4/22 for a well-child visit and to address the SC's reflux. The SC also received immunizations on 10/4/22 without any noted reactions. The pediatrician confirmed that the SM was advised to add rice cereal to the SC's bottle starting on 10/4/22 to address the reflux. The SC had previously been prescribed medication for reflux and was last given a dose on 10/3/22.

### Official Manner and Cause of Death

**Official Manner:** Undetermined  
**Primary Cause of Death:** Unknown  
**Person Declaring Official Manner and Cause of Death:** Medical Examiner

### Multidisciplinary Investigation/Review

**Was the fatality investigation conducted by a Multidisciplinary Team (MDT)?** Yes

**Was the fatality referred to an OCFS approved Child Fatality Review Team?** Yes

**Comments:** Onondaga County referred this fatality to their OCFS approved Child Fatality Review Team.

**Additional information, if necessary:**  
 OCDCFS offered bereavement and MH services to the mother, father, and SSs following the subject child's death. OCDCFS provided burial assistance to the family.

**Were services provided to siblings or other children in the household to address any immediate needs and support their well-being in response to the fatality? Yes**

**Explain:**  
 Bereavement services were offered on behalf of the SSs. The father of the 8yo SS refused to allow the SS to engage in MH counseling, despite the SM feeling counseling would be beneficial to the CHN. The 8yo SS was engaged in non-therapeutic counseling through his school.

**Were services provided to parent(s) and other care givers to address any immediate needs related to the fatality? Yes**

**Explain:**  
 Bereavement services were offered to the mother and father in response to the fatality; however, the mother stated she did not engage the family in counseling as she did not want the 8yo SS to feel left out since his father was not in agreement with his participation in services. The father of the SC was engaged in MH services prior to the fatality.
