<p>15. Please enter explanatory comments - The Office of Child Care (OCC) understands that state and territory systems vary in how they collect and report data for families, children, and providers funded fully or partially with CARES Act dollars versus other CCDF or non-CCDF monies. Please describe the population of families, children, and providers reported under #1, #2, and #8 of this form: [please specify - refer to the ACF-800 instructions for guidance]</p>	<p>Elements 1, 2, and 8: NY has only included families, children, and providers funded with borader CCDF funds. Elements 5 and 6: The number of children per provider type served through grants/contracts was estimated separately for NYC and Rest of State and those estimates combined for the final number. For NYC, the percentage of voucher vs contract enrollments from ACS and HRA were combined and applied to the total unduplicated number of children from element 2. For Rest of State, the average percentage of payments flagged as contracted in the Child Care Time and Attendance system was applied to the total unduplicated number of children from element 2. Element 7: It is not possible to distinguish between payments made directly to parents or made directly to providers on parents' behalf.</p>	

While your actual counts of families, children, and providers funded with CARES Act dollars may not be available as described above, we want all states and territories to provide annual estimates to help us understand how CARES Act dollars were used. Please provide numerical annual unduplicated estimates of the following broad categories of families, children and providers receiving subsidies for slots only, funded fully or partially through grants, contracts, or certificates. Do not include quality and supply grants that are NOT linked to the eligibility of specific families and children as those will be included under the Quality Progress Report.
