48	Orleans	9.4				Orle	
49	Genesee	11.4			Gene		
50	Westchester	14.9	West				

Note: Certain counties were excluded from the above table due to the following reasons: (1) counties with less than 50 Black children under 18 years; and (2) counties with less than 6 Black children with preventive services authorized. The following types of changes should be interpreted with extreme caution: (a) for small counties, particularly when the number of children in a particular category is small, sharp changes in disparity rates; and, (b) when disparity rate is available in one year and NOT for another, it indicates that the rate for the year where available was calculated on a small number, although above the requisite threshold.

Note: Certain counties were excluded from the above table due to the following reasons: (1) counties with less than 50 Hispanic children under 18 years; and (2) counties with less than 6 Hispanic children named as confirmed victims in CPS indicated reports. The following types of changes should be interpreted with extreme caution: (a) for small counties, particularly when the number of children in a particular category is small, sharp changes in disparity rates; and, (b) when disparity rate is available in one year and NOT for another, it indicates that the rate for the year where available was calculated on a small number, although above the requisite threshold.
